Hillary's Espionage Far More Grave Than Anyone Realizes

Early on (day one) I received insider information about Hillary's mail box. On day one they knew there were well over 10,000 classified documents that were deleted off of Hillary's hard drive, documents she was never supposed to have access to. And those E-mails constituted a revelation well worth nuking/rodling China over. Many people believe that China got the shaft because of financial decisions only, but I am going to explain just how grave the damage Hillary did to America is, and perhaps people will begin to understand why I think it had a lot to do with what happened in Tianjin.

First of all, they know the exact number of deletes Hillary did, because her "professional" was not so pro. How do they know? EASY: On the inside edge of any hard drive platter, there is a table which contains the location information for every file on the disk. When a delete is done, the table entries are flagged as deleted, (but the files are still on the disk, they are simply marked as writable space). Fine, her "pro" wrote and re-wrote that writable space, to do a hard erase, but the entries in the file table were still there, marked as writable space.

Normally you can't re-access these to see what the filenames were, unless . . . . . well, American intelligence has (and even I have) software that will simply command a hard drive to do a direct linear read of what is on it, and by doing this, they were able to dump the entire table to a readable file. They then sat down and read it line by line, deleted entries and all. And they found over 17,000 entries that had not been over written in this table. These entries did not contain the actual file they referred to, they only proved it existed, and when the files were wiped. This is how they knew, DAY ONE, AS I REPORTED HERE WITHOUT MINCING WORDS DAY ONE (almost a week ago now) that Hillary had THOUSANDS AND THOUSANDS of classified documents in her mail box.

Phase 2 in the Hillary bust - the death part.
Ok, so her "pro" wiped the files by writing over them with an application such as Norton clean sweep. Great. BUT, that only works against hacker joe. The NSA and any other respectable intelligence agency can still get a good idea of what was there before the wipe. This cannot be done if the platters are left in the original hard drive. This is how this next step (the death part) was done:

They took the platters out of the hard drive and loaded them into a special drive with special heads that are far more sensitive than any commercially produced hard drive has. They then looked for the sub modulations beneath the bits the wiping software put there, and were able to assemble enough from the remaining stray magnetic information to prove that the deleted files were in fact classified documents with all the details. As of this writing, 330 are confirmed, 17,000 more to go!~
Phase 3 in the Hillary bust: Staff screwups

Initially, when I "stumbled across" the insider information, all the intelligence agencies did was run the not deleted mails from a copy of her hard drive through a text string checker (they made a copy first and then read the copy, to help preserve the written over sub-bits in the original) and just from what Hillary presented straight up, they were able to use the copy (which contains no sub bits) to match text strings with classified documents that did not show up in what she presented as the "whole thing" and from that alone they totally busted her. Her staff was able to wipe all the stuff marked classified, but it was not able to find everything that was copied from classified documents and talked about. What you are hearing about coming out now is the proven classified documents they managed to extract from the written over portion of the original hard drive loaded into the forensic chassis, not what they knew straight up on day one.

From the initial bust they knew on day one, just from text string checking - the step that did not even require a deep dredging of wiped data, they were able to conclude that Hillary had many many moles inside the NSA, who gave her the encryption keys for the NSA's own satellites, and they beamed her whatever she wanted on request. Now proven to be over 17,000 documents in all. That most likely equals somewhere between 100,000 to a million pages of classified documents, all at the highest possible level. **How many classified documents per day does that equal? Enough to solidly prove that Hillary was far into the business of peddling classified data, and peg her as the #1 (known about) espionage agent in American history.**

Now consider who Hillary represents: The Bolshevik communist tip of the spear luciferian Jewish "destroy and enslave the world" cult. She simply cannot get busted for what she did, or the entire house of satan might bite the dust over it. After all, if she did it, he did it, they did it, now the genie is out of the bottle and the NSA knows it has been raped wholesale. If damage control cannot bury this, it is the end of a lot more than just Hillary. Would that be worth rodding China for, just for a simple topic diversion in the press? YES. Would that be worth waking up a volcano in Japan? YES. And it would even be worth a world war for the depraved death cult, BET ON IT.

**QUESTION THEN: Was the attack financial only, not considering Hillary at all?**

My guess: There was more than one motive, but Hillary was most likely part of it. Consider this: The bankers want to own the world. China was pushing for a gold backed currency. People cite China's currency devaluation as the reason for this blast, but at only 1.8 percent devaluation (which drives foreign sales by making Chinese products cheaper) I don't think that would be enough to trigger anything. **However, the gold backed currency might, there were also other financial factors that might, and what better way to send China a message to behave than to blow up an absolutely huge port, when China needs functioning ports for exportation of anything at all?**

They are saying the port was #10 in the world to downplay it's significance, but at #4 in China, it was very important. China will no doubt survive the strike on that port, (will be in business again within a month, the actual docks were not targeted) but wow, what a way to send a message about who is really in charge of things . . . . . .
I guess in the end the reasons were irrelevant. The method? If it was a follow up on a nuclear blackmail promise or a "rod from God" the details will not matter, China has been attacked, China is a nuclear armed super power, and China has people to spare. And that leads me to consider a suspect list.

The short list of nations that could and would do this: My first guess would be Israel, second guess would be Britain (because that is the new base for the Bolsheviks), third (close third) guess would be America. But in reality, when all cards are on the table, this was a tribal affair, it all boils down to that one stinking trouble making tribe .... any way you cut it, if Hillary needed a diversion for salvation or the bankers were upset about Chinese finance, it all boils down to the same rotten tribe. **AND CHINA IS NOT TOO STUPID TO SEE THIS.**

Hmmmm .... things could get interesting ....

**Hillary's NSA spooks really are the story of the decade**

Let me say this in a very simple way:

The NSA has been able to prove that Hillary had many many moles inside the NSA that used the great surveillance power of the NSA to steal America's secrets and hand them to the Chinese, the Israelis, and the Russians. These moles were so well entrenched and at such high level that they were able to use the NSA's own satellite uplink to send the classified data to Hillary. **And if Hillary was able to get this done, who else was able to use the NSA as their own treasure trove of information?** Having this happen clearly explains why almost ALL American companies are now Jewish owned, the Jews got EVERY PIECE OF INFORMATION THEY COULD POSSIBLY ASK FOR to assist in their final takeover and destruction of America. Nothing could be bigger or worse than that. It is GAME OVER.

And then we had the impossible Chinese blasts, right at the perfect time to take Hillary out of the news, people love fireworks and now that is all anyone cares about, and the story of the decade - the end of America for Americans goes down the toilet bowl in a great big swirling glurp.

They keep changing the story on what blew up to circumvent analysis. What I have here is what was really claimed to have blown up, and the correct answer for it.

I am not stupid at chemistry. The list of things that were given to cause the blasts does not add up, not even close. Carbide is practically an inert dust that is left laying around openly at steel mills, where melted blobs of metal often fly everywhere. The actual material being
blamed for the blast is butanone. Butanone is airplane modeling glue. You know, that stuff they banned 20 years ago because "kids sniffed it". Believe me, if it could blow up THAT BADLY modeling glue would have leveled many bedrooms. And then we have a compound of arsenic, which had practically no potential for anything other than creating a nasty gas or burning on the ground, if that, with no boom potential at all.

So let me put it all together here, the story goes like this, if those were the only 3 items in question:

Someone managed to get a bunch of modeling glue burning. And it sat there and burned for 45 minutes (nasty fire there, tough job putting that out, but no boom potential in the context of how it was stored or to even one percent of that magnitude.)

After it burned for a good long time, enough to ensure everyone was watching, somehow some small explosions were touched off to get people to start filming. Then the MOAB or some other huge explosive device comes in, and blows the whole place to smithereens. Bam-o, perfect show for burying the biggest known act of treason in American history - Hillary's Wal-Mart of American secrets, open to the highest bidder. If the story is modeling glue, it does not wash for that type of explosion, it just does not work that way.

What would I believe for the Chinese blast?

I'd believe that blast if someone said five thousand gallons of acetone dissolved acetylene went off. I'd believe that blast if someone said an entire semi load of tetra hydrazine went off. But modeling glue? Whoever drew that connection should be sentenced to wearing an underwear hat at the stockade, to be buried under a mountain of rotten eggs and tomatoes. And that is why China sent nothing but weapons experts to the blast scene, 218 in total, because they are not stupid about this.

And WHY would this be done? Because a media diversion was needed to bury the fact that the NSA finally got into Hillary's hard drive, and found text strings that identify THOUSANDS AND THOUSANDS of classified documents that were ripped right out of the NSA's underground bases and from those bases Hillary's spooks sent them straight up to a satellite that Hillary had been handed the encryption keys for. Hillary had no clearance or authorization for that, this is a massive case of espionage blown wide open. And these text strings were found AFTER all the actual documents they came from were wiped from the hard drive during Hillary's cleanup, and were found as quotes and snips in discussion e-mails her staff overlooked during the cleanup. If Hillary does not fry for this over the next few days, you can bet on America being finished. This is the litmus test.

The latest joke is that ammonium and potassium nitrate blew up. And that IS a joke, because if it is not mixed with fuel in the correct ratios it has no explosive potential at all. Stabbing at the common core with that one I guess . . . .
What would be the motive for this attack? I don't buy the currency devaluation, but something else very tasty was going on that a distraction was needed for, SUCH AS: You cannot "professionally wipe" a server and then hand it to ANY American intelligence agency, Hillary is BUSTED.
The only way you can secure a hard drive that is actually in the hands of the NSA is to either incinerate it or shred it down to dust. It won't matter if you use Norton Clean Sweep or some other app to purge it, even if a full write was done to the entire drive several times, enough stray magnetic data remains from past writes for the NSA to do a deep analysis of and extract - with errors, but they will at least know what is there, and THIS IS WHY THEY KNOW:

Hillary: THE ISSUE IS NOT THE E-MAILS, THE ISSUE IS THE FACT SHE HAD COUNTLESS SPOOKS INSIDE THE NSA FEEDING DATA STRAIGHT TO THE ENEMY. The mail box is just a diversion from this core fact! The tribe controlled MSM is trying to pawn off the worst proven case of espionage in America's history as a "mishandled mail box!" The fact the NSA never found that mail box before Hillary gutted the nation also proves that spooks inside that organization covered it all up!

Hillary: THE ISSUE IS NOT THE E-MAILS, THE ISSUE IS THE FACT SHE HAD COUNTLESS SPOOKS INSIDE THE NSA FEEDING DATA STRAIGHT TO THE ENEMY. The mail box is just a diversion from this core fact! The tribe controlled MSM is trying to pawn off the worst case of espionage in America's history as a "mishandled mail box!"

August 13 2015
I have doubts that the Chinese blasts were anything other than a military attack, they do not make sense to me in any other light. Looking into this for answers. Answers: The chemicals the company that got blamed for this actually stored could not have created the explosions. They might burn, but the explosions were from something else entirely.

Hmmmmm . . . . why would China send nuclear weapons experts to the blast site? Chemical weapons experts also? Hmmmmmm . . . . anyway, HILLARY.

Update: Butanone cannot explode like that, I double checked, and yes my chemistry is good enough for this. The chemicals at the site would only burn, there would be no blasts and that means there is probably a reason why China is sending weapons experts to the blast scene. Can you say B-2 Moab Hillary in the same sentence? Many are saying this was a threat over the Yuan, but I find this far too well timed with a much bigger issue - Hillary. Read the full report on Hillary, it is damning.

Make sure you read my Hillary E-mail report, down the page a ways now and:

Bolshevik Clintons
Dear Jim, re "The Clintons are Bolshevik communists," oh yes indeed. I have a trusted friend who spent a few years in Russia as an entrepreneur shortly after "the wall came down." The effort to do legitimate business required gulping vodka with KGB or Russian Mafia, period. My friend actually sat for hours in such a situation with two KGB generals. The Russians themselves brought up the subject of Clinton. They wished to express their extreme contempt for Bill Clinton as a traitor to his country. They said he had come over to them way back during his days at Oxford. Clinton had aided their cause, but their scorn for him was withering. Clinton: communist, yes, but traitor above all.
Grateful for your years of brilliant and courageous work, Jeff

**My response:** I have always known they were Bolshevik communists and have stated this from time to time, and the fact Hillary used well placed people in the NSA to funnel her thousands upon thousands of classified documents, which were used to destroy the nation certainly goes along with this quite well. Read the main Hillary E-mail report, it nails it.

**MORE THAN EDUCATED GUESS:** The Clintons are Bolshevik communists that used unauthorized NSA access to sell America down the river and then sank the boat.

I was holding my breath on Hillary's E-mails. Now the truth is out and from what has been gleaned from the wreckage after thousands and thousands of careful deletes it took her staff months to sift through and do in a convincing way, it is obvious, even from the wreckage that the Clintons had many many spies inside the NSA. These spies used the great power of the NSA to steal America's secrets, from everything from private individuals, to the military, to corporations and private companies, and then handed all the NSA raped data straight to the Chinese, the Russians, the Israelis, and anyone else who had a good shot at destroying America.

**Brazen claim you say? Well, I don't think so when you consider the following:**

Even after thousands upon thousands of known deletes, which took Hillary's staff months to accomplish in a way that left enough to look like a real E-mail account without having anything incriminating in it, the NSA was able to find word strings in various mails her staff missed that proved beyond a doubt Hillary had MANY MANY MANY mails that had top secret SCI level (and on top of that) specifically labeled "For American Eyes only" documents in them, even though the top secret warnings were nowhere to be seen. This can only happen if the real documents existed in previous mails, were copied from and quoted in other mails, sans the top secret labeling, and her staff was unable to fish it all out of what they decided should stay in the account to make it look like there was no cleanup.

Additionally, due to the content and traits of the text strings found, the NSA has concluded that via plants at the NSA, Hillary (and probably Bill as well) had the documents beamed straight out of the NSA up to the NSA's own satellite, which Hillary then received the information from via unauthorized admittance to a classified channel.

The NSA has concluded that at one time there were thousands upon thousands of clearly labeled classified documents in her mail box, which was wide open to the Chinese and
Russians. They have so far proven she raped classified information wholesale, but cannot confirm the full extent of what was raped (in its entirety) because it is only rational to conclude such a massive cleanup effort would at least be able to hide the final details.

The classified information found includes transcripts from NSA intercepted phone calls, (obviously) and from the way it looks, Hillary simply made requests to spooks in the NSA to get whatever she wanted to accomplish various objectives and receive various payoffs from foreign powers and additionally, for the purpose of gutting America. This type of information could (for example) include company secrets, technology secrets, political secrets, intelligence secrets, military secrets, THE WHOLE 9 YARDS, with thousands upon thousands of deletes verified by text strings that can't be matched with the original deleted documents but prove the documents existed.

The rape was extreme, and in my opinion explains clearly why America has lost at baseball in every game since the Clintons took office. It is my guess that this particular mail box was only one repository of classified information stolen by the Clintons, Bill probably has several, Al Dork probably has an entire vault, and even Chelsea probably has her own bouquet of classified data rapes, Hillary just proved that the Clinton family is ENEMY NUMBER ONE against the American people, (as if the sensible would miss that) and if Kikedom can put this detonated nuke back together it will prove that whatever the Clintons accomplished was enough to irrevocably destroy the nation.

No wonder why things went to hell in a hand basket.

And I'd like to add here my salient comments to the NSA:

What made you think it would be a good idea to start recording and saving all America's phone calls, all of America's corporate secrets, all of America's life blood to begin with? What was your problem? WHO GAVE THE ORDER? Why did you not arrest the President that gave that order? AAh yes you were fighting "terror" but when you defiled yourself all you did was make it possible for a rapist like Hillary to run amok in your playground. How could you not see that?

You killed the nation. And you killed the nation simply because your clearance process does not work, you hired countless spooks who then took your inward looking eyes and used them to make people like Hillary possible. She is not the only one, BET ON IT. AND NONE OF THIS WOULD HAVE BEEN POSSIBLE ANYWAY IF YOU DID NOT DEFILE YOUR PRIMARY OBJECTIVE: TO NEVER LOOK INWARD AT AMERICANS, YOU WERE ONLY SUPPOSED TO LOOK OUTWARD AT THE ENEMY AND NOW THAT YOU HAVE RAPED YOUR HOST, THAT HOST WILL PROBABLY DIE. NONE OF THIS WOULD HAVE HAPPENED, YOU WOULD HAVE NEVER ENABLED CRIMINALS LIKE HILLARY IF YOU NEVER LOOKED INWARD, WHICH YOU WERE NEVER SUPPOSED TO DO.

Absolutely NO security clearance will make the grade when those clearances have to protect YOUR OWN DAMN BLOOD.
It won't be much of a problem for most people to find the details in what I put above for themselves, this one is out in the open, but if you are having trouble here is one of several reports I used to reach my conclusions above, as well as my own background there, I know exactly how they screwed up, every NSA facility has satellite uplink and has had a link since the first satellites, I know precisely how Hillary received her loot.

Many people are going to make the mistake of thinking that Hillary simply got access to a "spy satellite" but this is not the case, the satellite in question does no spying, it is simply a top secret data hub and what was sent through it was far far worse than any "spy satellite" could accomplish.

If Hillary had the encryption keys for that particular satellite, it means the Russians and everyone else has them, this is a BIG ONE, Hillary makes Snowden look like a single flake in a blizzard.

The Spy Satellite Secrets in Hillary’s Emails

These weren’t just ordinary secrets found in Clinton’s private server, but some of the most classified material the U.S. government has. After months of denials and delaying actions, Hillary Clinton has decided to turn over her private email server to the Department of Justice. As this controversy has grown since the spring, Clinton and her campaign operatives have repeatedly denied that she had placed classified information in her personal email while serving as secretary of state during President Obama’s first term. (“I am confident that I never sent nor received any information that was classified at the time it was sent and received,” she said last month.) Her team also denied that she would ever hand over her server to investigators. Now both those assertions have been overturned.

Hillary Clinton has little choice but to hand over her server to authorities since it now appears increasingly likely that someone on her staff violated federal laws regarding the handling of classified materials. On August 11, after extensive investigation, the intelligence community’s inspector general reported to Congress that it had found several violations of security policy in Clinton’s personal emails.

Most seriously, the inspector general assessed that Clinton’s emails included information that was highly classified—yet mislabeled as unclassified. Worse, the information in question should have been classified up to the level of “TOP SECRET//SI//TK//NOFORN,” according to the inspector general’s report.

You may have seen acronym lists like these on declassified documents before—and glazed over them. This is the arcane language of the cleared cognoscenti, so let me explain what this means:

• TOP SECRET, as the name implies, is the highest official classification level in the U.S. government, defined as information whose unauthorized release “could cause exceptionally grave damage to national security or foreign relations.”
• SI refers to Special Intelligence, meaning it is information derived from intercepted communications, which is the business of the National Security Agency, America’s single biggest source of intelligence. They’re the guys who eavesdrop on phone calls, map who’s calling whom, and comb through emails. SI is a subset of what the intelligence community calls Sensitive Compartmented Information, or SCI. And these materials always require special handling and protection. They are to be kept in a Sensitive Compartmented
Information Facility, or SCIF, which is a special hardened room that is safe from both physical and electronic intrusion.
• TK refers to Talent Keyhole, which is an intelligence community caveat indicating that the classified material was obtained via satellite.
• NOFORN, as the name implies, means that the materials can only be shown to Americans, not to foreigners.

In short: Information at the “TOP SECRET//SI//TK//NOFORN” level is considered exceptionally highly classified and must be handled with great care under penalty of serious consequences for mishandling. Every person who is cleared and “read on” for access to such information signs reams of paperwork and receives detailed training about how it is to be handled, no exceptions—and what the consequences will be if the rules are not followed.

People found to have willfully mishandled such highly classified information often face severe punishment. Termination of employment, hefty fines, even imprisonment can result.

In the real world, people with high-level clearances are severely punished for willfully violating such rules. At a minimum, those suspected of mishandling things like NSA “signals intelligence”—intercepts calls, emails, and the like—have their clearances suspended pending the outcome of the investigation into their misconduct. Any personal items—computers, electronics—where federal investigators suspect the classified material wound up, wrongly, will be impounded and searched. If it has TOP SECRET//SI information on it, “your” computer now belongs to the government, because it is considered classified.

People found to have willfully mishandled such highly classified information often face severe punishment. Termination of employment, hefty fines, even imprisonment can result. Yes, people really do go to jail for mishandling classified materials. Matthew Aid, a writer on intelligence matters, served more than a year in prison for mishandling TOP SECRET//SI information from the NSA, for example. The well-connected tend to avoid jail, however. Sandy Berger and John Deutsch—who both served in high-level positions under President Bill Clinton, did not go to prison for mishandling TOP SECRET intelligence (though Berger got probation and was fined $50,000).

What, then, does all this mean for Hillary Clinton? There is no doubt that she, or someone on her State Department staff, violated federal law by putting TOP SECRET//SI information on an unclassified system. That it was Hillary’s private, offsite server makes the case even worse from a security viewpoint. Claims that they “didn’t know” such information was highly classified do not hold water and are irrelevant. It strains belief that anybody with clearances didn’t recognize that NSA information, which is loaded with classification markings, was signals intelligence, or SIGINT. It’s possible that the classified information
found in Clinton’s email trove wasn’t marked as such. But if that classification notice was omitted, it wasn’t the U.S. intelligence community that took such markings away. Moreover, anybody holding security clearances has already assumed the responsibility for handling it properly.

As secretary of state, Hillary Clinton had no authority to disseminate intelligence-community information on her own, neither could she make it less highly classified (a process termed “downgrading” in the spy trade) without asking permission first.

It is a very big deal and less-connected people who do this sort of thing ruin their lives, as any IC counterintelligence official can attest. During my NSA time, I saw junior personnel terminated for relatively minor infractions of security regulations. While the U.S. government unquestionably does over-classify items on the policy side, where almost everything in the Defense and State Departments gets some sort of classification stamp, not usually at a high level, intelligence reporting by its very nature is classified. If you don’t want the responsibility of a high-level government position, which inevitably brings with it TOP SECRET//SI access, then don’t accept that burden.

There’s still a lot we don’t know about Hillary Clinton’s Emailgate. Exactly how many emails contained TOP SECRET//SI information is unclear. We may never know since thousands of emails were already destroyed by Clinton. Who exactly placed the classified information in emails—it may not have been Hillary Clinton—and how did they access the information in the first place? How many of her staffers at Foggy Bottom were also using her personal server?

Underlying all this is the question of why Hillary Clinton decided to employ her own private email and server to handle so much of her official State Department business. This is, to say the least, highly irregular—not to mention a violation of numerous U.S. government rules and regulations—so there had to be a compelling reason to do this. What was it?

The Clinton campaign was concerned enough about the issue to send out an email blast Wednesday afternoon with the subject line: “A note about Hillary Clinton’s emails.”

“You might hear some news over the next few days about Hillary Clinton’s emails,” began the email from Jennifer Palmieri, the communications director for Hillary for America.

“Because you are an important part of this team, we wanted to take a few minutes to talk through the facts—we need your help to make sure they get out there. There’s a lot of misinformation, so bear with us; the truth matters on this.”

Underneath the greeting were several bolded bullet points, including, “Hillary didn’t send any classified materials over email.” There was also a link to a longer, 4,000+ word explanation of why Clinton used a private email address and server in her official capacity as secretary of state.
The FBI is now on the case and one hopes they will exercise due diligence in their investigation of what may be a serious leak of classified information, made worse by the fact that Clinton’s personal server was wholly unencrypted for three months, leaving it wide open to exploitation by foreign intelligence services.

The number of spy services interested in the communications of the U.S. secretary of state numbers more than a hundred. Given their technical proficiency, it’s naïve to assume that the Russians and Chinese aren’t among them—a fact that John Kerry, the current secretary, recently admitted.

It’s safe to assume, then, that Moscow and Beijing know what Hillary’s “private” emails as Secretary of State contained. Let’s hope that the American public will someday as well.

1. NOT A GOOD LOOK
6 days ago
Hillary Clinton will hand over to the Justice Department the private email server she used during her time as secretary of state, spokesman Nick Merrill said. A “thumb” memory device containing copies of the emails will also be handed over. The inspector general for the intelligence community notified senior members of Congress on Tuesday that two of the four classified emails found on Hillary Clinton’s private account are categorized as “top secret.” The intelligence community also revealed it is reviewing “personal communications hardware and software” used by Clinton’s former top aides. “We will follow the facts wherever they lead, to include former aides and associates, as appropriate,” said Douglas Welty, a spokesman for the State Department’s inspector general.

Classified Hillary Emails Had CIA, NSA Info

Classified emails stored on Hillary Clinton's private computer server contained information from five U.S. intelligence agencies, including the CIA and NSA, McClatchy reported
Thursday. One of the emails about the 2012 Benghazi consulate attack was even released to the public by the State Department in May despite it being classified. That email contained information from the NSA, the Defense Intelligence Agency, and the National Geospatial-Intelligence Agency, which uses spy satellites. Four other emails contained info from the CIA and the Office of the Director of National Intelligence, which oversees all intelligence agencies. The inspector general for the intelligence community found the five classified emails out of a sample of 40 from the 30,000 emails Clinton gave to the State Department.

But perhaps the most troubling element in the McClatchy story is the assertion that “the State Department so far has refused to grant the intelligence-community inspector general access to the entire batch of emails on jurisdictional grounds.”

A State Department spokesperson called the line “untrue,” adding, “To provide for greater cooperation through this process, a team of IC FOIA [Intelligence Community Freedom of Information Act] reviewers—at the invitation of the Department—are reviewing [the] emails.”

“We have had a chance to review the statement released by the inspectors general of the State Department and intelligence community outlining their concerns with regard to the State Department’s review and release of Hillary Clinton’s work emails,” Clinton campaign spokesman Nick Merrill told The Daily Beast in an email. “We want to ensure that appropriate procedures are followed as these emails are reviewed while not unduly delaying the release of her emails. We particularly do not want their release to be hampered by bureaucratic infighting among the intelligence community. More emails are slated to be released by the State Department next week, and we hope that release is as inclusive as possible.”

Hillary Clinton on emails: 'The facts are pretty clear'
By Eugene Scott, CNN
Updated 7:41 AM ET, Tue July 28, 2015
Democratic presidential candidate Hillary Clinton on Saturday said she did not send classified emails from her private server while she was secretary of state.

"I am confident that I never sent nor received any information that was classified at the time it was sent and received," Clinton told reporters in Winterset, Iowa.

She added that the latest controversy is an example of disagreement among various parts of the government about what should or should not be publicly released.

Clinton's remarks come after The New York Times reported Thursday night that inspectors general for the intelligence community and the State Department had asked the Justice Department to launch a criminal investigation into Clinton's possible mishandling of classified email. But the paper significantly revised its story the next day to say the matter was referred to Justice to examine whether sensitive government information was mishandled in connection with Clinton's account -- but not necessarily by Clinton.
On Friday, CNN reported that the inspector general for the intelligence community had informed members of Congress that some material Clinton emailed from her private server contained classified information, but it was not identified that way.

**RELATED: Clinton emails contained classified information, official says**

Because it was not identified, it is unclear whether Clinton realized she was potentially compromising classified information. The inspector general reviewed a "limited sampling" of her emails, and among those 40 reviewed, found that "four contained classified (intelligence community) information," inspector general Charles McCullough wrote in a letter to Congress.

McCullough’s office has confirmed it has asked the Justice Department to look into how the State Department handled the classification of documents, but emphasized it was not requesting a criminal investigation.

Clinton said she has no idea what are the four specific emails the inspector general was talking about in his letter to Congress.

"But the facts are pretty clear," Clinton said. "I did not send or receive anything that was classified at the time."

Clinton told reporters she turned over 55,000 pages of emails to help the State Department because officials asked all former secretaries to provide any information possible to help with their record keeping.

"So I did, but then I said, 'OK, so let's make it public,'" she said. "Now if I had just turned it over, we would not be having this conversation."

**RELATED: Clinton focuses on economy amid email controversy**

Clinton said her desire to make things public requires that it goes through the public records request process.
"If we were not asking for it to be made public, there would not be a debate. This is all about my desire to have transparency and make the information public," she said.

All of the emails are already on the unclassified system of the State Department, Clinton said.

"The vast majority of anything that I sent or received was already on the State Department system, the unclassified State Department system," she said. "In order to respond to freedom of information requests, you'd have to go through the same process."

Republican National Committee spokesman Michael Short said Clinton "can't help but continue to mislead the American people."

"The facts are clear: independent government investigators found that Hillary Clinton possessed information that was classified at the time on her secret email server," Short said in a statement Saturday. "Hillary Clinton's reckless attempt to get around public records laws has jeopardized our national security."

Trey Gowdy: Hillary Clinton wiped her server clean

By LAUREN FRENCH

3/27/15 6:23 PM EDT

Updated 3/27/15 7:57 PM EDT
Hillary Clinton wiped “clean” the private server housing emails from her tenure as secretary of state, the chairman of the House committee investigating the 2012 terrorist attacks in Benghazi said Friday. “While it is not clear precisely when Secretary Clinton decided to permanently delete all emails from her server, it appears she made the decision after October 28, 2014, when the Department of State for the first time asked the Secretary to return her public record to the Department,” Rep. Trey Gowdy (R-S.C.), chairman of the Select Committee on Benghazi, said in a statement.

Clinton was under a subpoena for all correspondence from her tenure as secretary of state that focused on Libya and Benghazi. | Getty

Clinton was under a subpoena order from the panel for all documents related to the 2012 attacks on the American compound there. But David Kendall, an attorney for Clinton, said the 900 pages of emails previously provided to the panel cover its request. Kendall also informed the committee that Clinton’s emails from her time at the State Department have been permanently erased.

Hillary’s brother raised Chinese money for McAuliffe’s green car venture

Gowdy said that Clinton’s response to the subpoena means he and Speaker John Boehner (R-Ohio) will now contemplate new legal actions against Clinton. “After seeking and receiving a two week extension from the Committee, Secretary Clinton failed to provide a single new document to the subpoena issued by the Committee and refused to provide her private server to the Inspector General for the State Department or any other independent arbiter for analysis,” Gowdy said.

Clinton previously said she decided to delete the emails after her lawyers reviewed the server for work-related correspondence. She said the deletion of private emails occurred “at the end” of that review.
In a letter provided to the committee, Kendall said Clinton would not be turning over the server to a third-party for review and that the emails no longer exist on the private server located in her New York home.

“There is no basis to support the proposed third-party review of the server that hosted the hdr22@clintonemail.com account,” Kendall wrote. “To avoid prolonging a discussion that would be academic, I have confirmed with the secretary’s IT support that no emails…..for the time period January 21, 2009 through February 1, 2013 reside on the server or on any back-up systems associated with the server.”

GLENN THRUSH and ANNIE KARNI

The broad subpoena from Gowdy included any emails relating to Libya, weapons located in the country, the Benghazi attacks and administration statements following the attacks on the compound.

Shortly after the New York Times reported on Clinton’s private email use, she requested that the State Department make public all documents from her time at the agency. The State Department has said it’s working though these documents – which include 55,000 pages – for review.

The agency has also said it will focus on vetting the 300 pages the Benghazi Committee has already received. Kendall said the State Department is “uniquely positioned” to respond to requests for additional documents, a sign from Clinton’s camp that they believe she has fully responded to any standing legal requests.

Kendall added, “Thus, there are no hdr22@clintonemail.com e-mails from Secretary Clinton’s tenure as Secretary of State on the server for any review, even if such review were appropriate or legally authorized.”

The letter added that requests from a second email, hrod17@clintonemail.com, are not germane as that address was “not an address that existed during Secretary Clinton’s tenure.”

Report cites favoritism for McAuliffe and brother of Hillary Clinton
JOSH GERSTEIN

Rep. Elijah Cummings, the top Democrat on the Benghazi panel, said Clinton’s response “confirms” that the former secretary of state has provided all documents related to the Benghazi attacks to the committee.

“This confirms what we all knew—that Secretary Clinton already produced her official records to the State Department, that she did not keep her personal emails, and that the Select Committee has already obtained her emails relating to the attacks in Benghazi,” said Cummings (D-Md.). “It is time for the Committee to stop this political charade and instead make these documents public and schedule Secretary Clinton’s public testimony now.”

The move all but ensures congressional Republicans’ focus on Clinton will intensify. The Benghazi panel has already said it will bring Clinton in to testify at least twice — once privately about her email use while at State and at another public hearing on the Obama administration’s reaction to Benghazi.

The House Oversight and Government Reform Committee has also signaled plans to investigate Clinton’s use of private email.

Gowdy’s subpoenas came after it was reported that Clinton stored her emails on a private server and used a personal email address while at the State Department. Clinton has already made more than 900 pages of emails available to the committee but the panel has requested the entire swath of documents – a request Gowdy has repeatedly said is necessary to conduct a thorough investigation into the 2012 terrorist attacks.
Hillary’s Secret Email Was a Cyberspy’s Dream Weapon
When a notorious online break-in artist got a hold of the Secretary of State’s now-infamous email address, he gave himself the power to use it to target the global elite. The private email address for Hillary Clinton, which became the talk of Washington this week and created her first major speed bump on her road to the White House, has actually been freely available on the Internet for a year, thanks to a colorful Romanian hacker known as Guccifer.

On March 14, 2013, Guccifer—his real name is Marcel-Lehel Lazar—broke into the AOL account of Sidney Blumenthal, a journalist, former White House aide to Bill Clinton, and personal confidante of Hillary Clinton. Lazar crowed about his exploits to journalists, disclosing a set of memos Blumenthal had written to Clinton in 2012, as well as the personal email address and domain she’s now known to have used exclusively for her personal and official correspondence.

Few journalists noticed that at the time, and it caused no ruckus in Washington. But the fact that Clinton’s private email was now public means she was not just putting her own information at risk, but potentially those in the circle of people who knew her private address.

Her email account was the ultimate hacker’s lure. It’s a common technique to impersonate a trusted source via email, in order to persuade a recipient to download spyware hidden inside seemingly innocuous attachments. Indeed, Clinton’s own staff had been targeted with such highly targeted “spear phishing” emails as early as 2009, the year she took office. And according to U.S. authorities, Lazar, who’s now serving a seven-year prison sentence in Romania and is accused of hacking the accounts of other Washington notables like Colin Powell, did commandeer other people’s email accounts. Then he used them to send messages exposing the private correspondence of his other victims.

When her address was exposed, Clinton was running her private email account on equipment in her home in New York, which security experts say is an inherently weak setup that made her more vulnerable to hacking.

It’s not clear whether Lazar tried to hack Clinton’s domain or if he used his access to Blumenthal’s account to do so. But he was within digital striking distance of the secretary, inside the email of a Clinton ally who, as one longtime Blumenthal friend told The Daily Beast, is “a blooded member of Hillaryland, perhaps the personification of that corps who are closest to her inner circle.”

Blumenthal sent Clinton a range of missives covering topics such as U.S.-Egyptian relations to how she was recovering from a concussion. Once he was inside Blumenthal’s account, Lazar could have easily “spear phished” this most senior member of President Obama’s cabinet.
Had security experts checked the system, they might not have liked what they saw. One security scan this week revealed that Hillary’s domain uses “obsolete and insecure” protocols and gave it an overall F rating.

Blumenthal still maintains the once-hacked AOL account. Requests for comment sent there weren’t returned.

Before Lazar exposed the email domain, it would have been known to people with whom Clinton was trading emails, as well as to a tight inner circle lucky enough to be given@clintonemail.com accounts. Those included Clinton’s daughter, Chelsea, and aide Huma Abedin, whom the former secretary treats like family. Maybe Clinton and her staff thought the relative anonymity of her email domain would have given her a measure of security. It’s hard to say, since they and State Department officials have consistently refused to answer journalists questions about what security measures Clinton took to protect her “homebrew” email system.

But “assuming that the domain is ‘secret’ is a dangerous assumption,” Johannes Ullrich, a computer security expert with the SANS Institute, told The Daily Beast.

“A not-well-published domain does not provide significant protection,” Ullrich said. “As seen in the Guccifer incident, it is easy to unmask such domains if just one of the individuals she is corresponding with is breached. At the same note, running a mail server securely is difficult.”

Ullrich said that because email servers communicate with many different outside systems, “e-mail is probably the most dangerous attack vector” that a hacker could use. The fact that Lazar had exposed her private account a year ago suggests that Clinton could have taken steps at the time to better protect herself. Whether she did or not, her aides aren’t saying.

“We have no indication the account was hacked or compromised,” a senior State Department official told The Daily Beast. But unless State inspected the system, officials have no way of knowing that. By the department’s own admission, officials didn’t contact Clinton about turning over emails on her account until October 2014, nearly two years after she’d left office, when the law on official records was being changed to cover emails sent on private accounts.

Had security experts checked the system, they might not have liked what they saw. One security scan this week revealed that the domain uses “obsolete and insecure” protocols and gave it an overall F rating.

The only Blumenthal emails Lazar is known to have disclosed, within days of hacking the account, were four memos from September 2012, marked “classified,” and containing what Blumenthal described as on-the-ground intelligence about the attack on the U.S. consulate in
Benghazi. The disclosure tipped off Blumenthal to the breach, allowing him to change the password on his account and regain control.

Perhaps fortunately for Clinton, Lazar was more interested in snooping than spying. That may explain why he may have passed on a golden opportunity to get inside Clinton’s email account, as well. He’s “just a smart guy who was very patient and persistent” and who “wanted to be famous” for showing that he could embarrass Washington power brokers and other celebrities, a Romanian prosecutor told the New York Times, which published a profile of Lazar last year. Among the purloined correspondence he disclosed were emails between Powell and a Romanian diplomat, which were so intimate that Powell had to publicly declare the woman was just a friend and nothing more.

In an interview with the the Times, the imprisoned hacker rambled about “a potpourri of conspiracy theories” he tied to the so-called Illuminati, whom he described as the “very rich people, noble families, bankers and industrialists from the 19th and 20th century” that he said run the world, are responsible for the death of Princess Diana and the 9/11 attacks, and whose email the world deserves to see.

He now seems hardly much of a threat, and was apprehended by Romanian authorities after bragging about his high-profile American victims secretly running the world. He’d also targeted Romanian officials, making him a wanted man in his own country.

But plenty of people were trying to spy on Clinton and the people around her, and Lazar arguably made their job easier.

Indeed, Clinton had been targeted by hackers and cyber spies practically from the moment she took office. In 2009, a senior member of Clinton’s staff received a spear phishing email that purported to come from a colleague in the office next door, according to former officials with knowledge of the matter. The email contained an attachment that the sender claimed was related to a recent meeting, but the recipient couldn’t recall that the meeting had ever occurred. When he inquired with his colleague, he was met with a blank stare.

Had the Clinton staffer opened the attachment, it would have installed spyware on his computer and potentially allowed a hacker to spy on other people using the State Department network. Former officials said the spear phishing email likely came from China.

That same year, in a separate hacking attempt, five State Department employees who were negotiating with Chinese officials on efforts to reduce greenhouse-gas emissions received spear phishing emails claiming to come from a prominent Washington journalist, Bruce Stokes.

Signs pointed to the email being legitimate: The U.S. climate change envoy, Todd Stern, was a friend of Stokes’, and the subject line of the email read “China and Climate Change,” which seemed like a reporter’s inquiry. Stokes is also married to Ambassador Wendy Sherman, a seasoned diplomat who went on to lead U.S. negotiations with Iran over its
nuclear program. The body of the message included comments related to the recipients’ jobs and their work at the time.

The spear phishing incident was documented in a State Department cable, part of a massive cached disclosed by WikiLeaks. It’s unclear whether anyone opened an attachment in the email that contained a virus, which could siphon information off the infected computer. But whomever sent the message had studied Stokes, knew who his associates were, and understood what would prompt them to trust the email.

It’s that kind of information that a reasonably sophisticated hacker could glean from someone in touch with the secretary of state. What was on her mind? What did she care about? What was likely to get her to open an attachment? Knowing the private domain Clinton used would have made any spear phishing email look more legitimate.

“At the very least, she should have been worried about individuals impersonating the [clintonemail.com] domain,” Ullrich said. Setting up standard mail filtering mechanisms and proper security certificates “would be a first step, but that should have happened right from the start,” he said.

Right from the start would have been in the days before her Senate confirmation in 2009, when the private email account was set up. If Clinton didn’t realize then that she was a security risk then, the Chinese hackers trying to break into her office should have tipped her off

MEMORANDUM FOR:       SEE DISTRIBUTION

SUBJECT:              Update Classified Materials on Personal Electronic Storage Devices

REFERENCE:            23 July 2015 - Summary of IC IG support to State Department IG

(U) In response to the above referenced congressional notification, my office received multiple Congressional requests for copies of Former Secretary Clinton’s emails containing classified Intelligence Community (IC) information. These emails, attached hereto, have been properly marked by IC classification officials, and include information classified up to “TOP SECRET//SI/TK//NOFORN.”

(U) IC classification officials reviewed two additional emails and judged that they contained classified State Department information when originated. These officials referred the emails to State Department classification officials on 7 August 2015 for final determination on current classification. We will provide these documents once they have been properly marked by State Department. 

(U) This represents the most accurate accounting of the emails identified to date, as summarized at TAB 1. We will provide updates as we learn more. If you have any questions, please contact our office at 571-204-8149.

Sincerely,

I. Charles McCullough, III

Updated: The Facts About Hillary Clinton’s Emails

We’ve put all of the information about Hillary Clinton’s State Department emails here. Just the facts, all in one place.

Why did Clinton use her own email account?

When Clinton got to the Department, she opted to use her personal email account as a matter of convenience. It enabled her to reach people quickly and keep in regular touch with her family and friends more easily given her travel schedule.

That is the only reason she used her own account.

Her usage was widely known to the over 100 State Department and U.S. government colleagues she emailed, consistent with the practice of prior Secretaries of State and permitted at the time.

As Clinton has said, in hindsight, it would have been better to just have two accounts. While she thought using one account would be easier, obviously, that has not been the case.

Was it allowed?

Yes. The laws, regulations, and State Department policy in place during her tenure permitted her to use a non-government email for work.

The 2009 National Archives regulation in place during her tenure required that "[a]gencies that allow employees to send and receive official electronic mail messages using a system not operated by the agency must..."
ensure that Federal records sent or received on such systems are preserved in the appropriate agency recordkeeping system." The regulation recognizes the use of non-government email accounts.

As she has stated, Clinton's practice was to email government officials on their "gov" accounts, so her work emails were immediately captured and preserved. In fact, more than 90% of those emails should have already been captured in the State Department’s email system before she provided them with paper copies.

A Politifact analysis also confirmed that Clinton's practices complied with laws and regulations, including support from the former director of a prominent government accountability organization: "In Clinton's defense, we should note that it was only after Clinton left the State Department, that the National Archives issued a recommendation that government employees should avoid conducting official business on personal emails (though they noted there might be extenuating circumstances such as an emergency that require it). Additionally, in 2014, President Barack Obama signed changes to the Federal Records Act that explicitly said federal officials can only use personal email addresses if they also copy or send the emails to their official account. Because these rules weren't in effect when Clinton was in office, 'she was in compliance with the laws and regulations at the time,' said Gary Bass, founder and former director of OMB Watch, a government accountability organization."

Clinton said she did not use her email to send or receive classified information, but the State Department and two Inspectors General said some of these emails do contain classified information. Was her statement inaccurate?

Clinton only used her account for unclassified email. No information in Clinton's emails was marked classified at the time she sent or received them.

When information is reviewed for public release, it is common for information previously unclassified to be upgraded to classified if the State Department or another agency believes its public release could cause potential harm to national security, law enforcement or diplomatic relations.

After reviewing a sampling of the 55,000 pages of emails, the Inspectors General have proffered that a small number of emails, which did not contain any classified markings and/or dissemination controls, should have been classified at the time they were sent. The State Department has said it disagrees with this assessment.

Clinton hopes the State Department and the agencies involved in the review process will sort out as quickly as possible which of the 55,000 pages of emails are appropriate to share with the public.

How did Clinton receive and consume classified information?

The Secretary's office was located in a secure area. Classified information was viewed in hard copy by Clinton while in the office. While on travel, the State Department had rigorous protocols for her and traveling staff to receive and transmit information of all types.

A separate, closed email system was used by the State Department for the purpose of handling classified communications, which was designed to prevent such information from being transmitted anywhere other than within that system.

Is Department of Justice conducting a criminal inquiry into Clinton’s email use?

No. As the Department of Justice and Inspectors General made clear, the IGs made a security referral. This was not criminal in nature as misreported by some in the press. The Department of Justice is now seeking assurances about the storage of materials related to Clinton’s email account.
Is it true that her email server and a thumb drive were recently turned over to the government? Why?

Again, when information is reviewed for public release, it is common for information previously unclassified to be upgraded to classified if the State Department or another agency believes its public release could cause potential harm to national security, law enforcement or diplomatic relations.

Clinton hopes that State and the other agencies involved in the review process will sort out as quickly as possible which emails are appropriate to share with the public, and that the release will be as timely and as transparent as possible.

When the Department upgraded some of the previously unclassified email to classified, her team worked with the State Department to ensure copies of her emails were stored in a safe and secure manner. She also directed her team to give her server that hosted her email account while she was Secretary to the Department of Justice, as well as a thumb drive containing copies of her emails that already had been provided to the State Department. Clinton has pledged to cooperate with the government's security inquiry.

Would this issue not have arisen if she used a state.gov email address?

Even if Clinton's emails had been on a government email address and government device, these questions would be raised prior to public release.

While the State Department's review of her 55,000 emails brought the issue to the Inspectors Generals' attentions, the emails that recently were upgraded to classified prior to public release were on the unclassified .gov email system. They were not on the separate, closed system used by State Department for handling classified communications.

Have Clinton's State Department aides also been asked to provide the Department and Congress with emails from their personal accounts?

We understand that members of her State Department staff were recently asked to assist the Department in its record-keeping by providing any work-related emails they may have on personal accounts. They have received requests from Rep. Gowdy as well.

Clinton is proud of the work of all the dedicated public servants that were part of her team at the State Department. She was proud of her aides then and is proud of them now, as they have committed - as she has - to being as helpful as possible in responding to requests.

Press reports say she used multiple devices – a Blackberry and an iPad – is that true?

Clinton relied on her Blackberry for emailing. This was easiest for her. When the iPad came out in 2010, she was as curious as others and found it great for shopping, browsing, and reading articles when she traveled. She also had access to her email account on her iPad and sometimes used it for that too.

Was she ever provided guidance about her use of a non-".gov" email account?

The State Department has and did provide guidance regarding the need to preserve federal records. To address these requirements, it was her practice to email government employees on their ".gov" email address. That way, work emails would be immediately captured and preserved in government record-keeping systems.

What did Clinton provide to the State Department?
On **December 5, 2014**, 30,490 copies of work or potentially work-related emails sent and received by Clinton from March 18, 2009, to February 1, 2013, were provided to the State Department. This totaled roughly 55,000 pages. More than 90% of her work or potentially work-related emails provided to the Department were already in the State Department's record-keeping system because those e-mails were sent to or received by "state.gov" accounts.

Early in her term, Clinton continued using an att.blackberry.net account that she had used during her Senate service. Given her practice from the beginning of emailing State Department officials on their state.gov accounts, her work-related emails during these initial weeks would have been captured and preserved in the State Department's record-keeping system. She, however, no longer had access to these emails once she transitioned from this account.

**Why did the Select Committee announce that she used multiple email addresses during her tenure?**

In fairness to the Committee, **this was an honest misunderstanding.** Clinton used one email account during her tenure at State (with the exception of her initial weeks in office while transitioning from an email account she had previously used). In March 2013, a month after she left the Department, Gawker published the email address she used while Secretary, and so she had to change the address on her account.

At the time the printed copies were provided to the Department in 2014, because it was the same account, the new email address established after she left office appeared on the printed copies as the sender, and not the address she used as Secretary. In fact, this address on the account did not exist until March 2013. This led to understandable confusion that was cleared up directly with the Committee after its press conference.

**Why didn't Clinton provide her emails to the State Department until December 2014?**

In 2014, after recognizing potential gaps in its overall recordkeeping system, the State Department asked for the help of the four previous former Secretaries in meeting the State Department's obligations under the Federal Records Act.

Clinton responded to this request by providing the State Department with over 55,000 pages of emails. As it was Clinton's practice to email U.S. government officials on their .gov accounts, the overwhelming majority of these emails should have already been preserved in the State Department’s email system.

In providing these emails to the Department, Clinton included all she had that were even potentially work-related—including emails about using a fax machine or asking for iced tea during a meeting—errong on the side of over-inclusion, as confirmed by the Department and National Archives' determination that over 1250 emails were "personal" records (which they have indicated will be returned to her).

After providing her work and potentially work-related emails, she chose not to keep her personal, non-work related emails, which by definition, are not federal records and were not requested by the Department or anyone else.

**Why did the State Department ask for assistance in collecting records? Why did the State Department need assistance in further meeting its requirements under the Federal Records Act?**

The State Department formally requested the assistance of the four previous former Secretaries in a letter to their representatives dated October 28, 2014, to help in further meeting the Department’s requirements under the Federal Records Act.
The letter stated that in September 2013, the National Archives and Records Administration (NARA) issued new guidance clarifying records management responsibilities regarding the use of personal email accounts for government business.

While this guidance was issued after all four former Secretaries had departed office, the Department decided to ensure its records were as complete as possible and sought copies of work emails sent or received by the Secretaries on their own accounts.

**Why did Clinton decide not to keep her personal emails?**

As Clinton has said before, these were private, personal messages, including emails about her daughter's wedding plans, her mother's funeral services and condolence notes, as well as emails on family vacations, yoga routines, and other items one would typically find in their own email account, such as offers from retailers, spam, etc.

**Did Clinton delete any emails while facing a subpoena?**

No. As noted, the emails that Clinton chose not to keep were personal emails—they were not federal records or even work-related—and therefore were not subject to any preservation obligation under the Federal Records Act or any request. Nor would they have been subject to the subpoena—which did not exist at the time—that was issued by the Benghazi Select Committee some three months later.

Rep. Gowdy's subpoena issued in March 2015 did not seek, and had nothing to do with, her personal, non-work emails nor her server nor the request by State Department last year for her help in their own record-keeping. Indeed in his March 19th letter, Rep. Gowdy expressly stated he was not seeking any emails that were "purely personal in nature."

In March 2015, when Rep. Gowdy issued a subpoena to Clinton, the State Department had received all of Clinton's work-related emails in response to their 2014 request, and indeed, had already provided Clinton's relevant emails to Rep. Gowdy's committee.

Rep. Gowdy, other Republicans, and some members of the media have seized on a CNN interview with Clinton to question her on this point. Rep. Gowdy has even gone so far as to say Clinton is lying. But he and the others are clearly mistaken.

As Vox reported, "[S]he didn't lie about the subpoena. … Clinton clearly wasn't responding to the question of whether she'd ever been subpoenaed by the Benghazi Committee but whether she'd been subpoenaed before she wiped the emails from her server." Additionally, Factcheck.org said in its analysis, "Clinton's denial came in response to a question about deleting emails 'while facing a subpoena,' and Clinton objected to Keilar's 'assumption.' Clinton’s campaign said that the emails were deleted before she received the subpoena and that was the point Clinton was making." Politifact added, "Suggesting that Clinton deleted emails while facing a subpoena contradicts what we know about the controversy so far."

Vox went on to further decry Rep. Gowdy's reaction, saying, "[T]his one's a particularly absurd gimmick, even for a committee that is selectively leaking from depositions and documents to justify its existence. If there was a more extreme category of dissembling than 'pants on fire,' now would be the time for Politifact to roll it out on the House Republicans."

**Why was the State Department given printed copies?**

That is the requirement. The instructions regarding electronic mail in the Foreign Affairs Manual (the Department's policy manual) require that "until technology allowing archival capabilities for long-term
electronic storage and retrieval of email messages is available and installed, those messages warranting preservation as records (for periods longer than current E-mail systems routinely maintain them) must be printed out and filed with related records." [5 FAM 443.3].

**Were any work items deleted in the course of producing the printed copies?**

No.

**How many emails were in her account? And how many of those were provided to the State Department?**

Her email account contained a total of 62,320 sent and received emails from March 2009 to February 2013. Based on the review process described below, 30,490 of these emails were provided to the Department, and the remaining 31,830 were private, personal records.

**How and who decided what should be provided to the State Department?**

The Federal Records Act puts the obligation on the government official to determine what is and is not a federal record. The State Department Foreign Affairs Manual outlines guidance "designed to help employees determine which of their e-mail messages must be preserved as federal records and which may be deleted without further authorization because they are not Federal record materials." [5 FAM 443.1(c)].

Following conversations with State Department officials and in response to the State Department's 2014 letter to former Secretaries, Clinton directed her attorneys to assist by identifying and preserving all emails that could potentially be federal records. This entailed a multi-step process to review each email and provide printed copies of Clinton's emails to the State Department, erring on the side of including anything that might be even potentially work-related.

A search was conducted on Clinton's email account for all emails sent and received from 2009 to her last day in office, February 1, 2013.

After this universe was determined, a search was conducted for a ".gov" (not just state.gov) in any address field in an email. This produced over 27,500 emails, representing more than 90% of the 30,490 printed copies that were provided to the State Department.

To help identify any potential non-.gov correspondence that should be included, a search of first and last names of more than 100 State Department and other U.S. government officials was performed. This included all Deputy Secretaries, Under Secretaries, Assistant Secretaries, Ambassadors-at-Large, Special Representatives and Envoys, members of the Secretary's Foreign Policy Advisory Board, and other senior officials to the Secretary, including close aides and staff.

Next, to account for non-obvious or non-recognizable email addresses or misspellings or other idiosyncrasies, the emails were sorted and reviewed both by sender and recipient.

Lastly, a number of terms were specifically searched for, including: "Benghazi" and "Libya."

These additional three steps yielded just over another 2,900 emails, including emails from former Administration officials and long-time friends that may not be deemed by the State Department to be federal records. And hundreds of these emails actually had already been forwarded onto the state.gov system and captured in real-time.
With respect to materials that the Select Committee has requested, the State Department has stated that just under 300 emails related to Libya were provided by the State Department to the Select Committee in response to a November 2014 letter, which contained a broader request for materials than prior requests from the House Oversight and Government Reform Committee.

Given Clinton's practice of emailing State Department officials on their state.gov addresses, the State Department already had, and had already provided, the Select Committee with emails from Clinton in August 2014 – prior to requesting and receiving printed copies of her emails.

The review process described above confirmed Clinton's practice of emailing State Department officials on their .gov address, with the vast majority of the printed copies of work-related emails Clinton provided to the State Department simply duplicating what was already captured in the State Department's record-keeping system in real time.

Did Clinton use this account to communicate with foreign officials?

During her time at State, she communicated with foreign officials in person, through correspondence, and by telephone. The review of all of her emails revealed only one email with a foreign (UK) official.

Did she withhold any work emails? What about the 15 emails that Sid Blumenthal provided to the Select Committee that she did not provide to the State Department?

She provided the State Department with all work and potentially work-related emails that she had, including all of her correspondence with Sid Blumenthal. We understand that Mr. Blumenthal had some emails that Clinton did not have, and Clinton had some emails that Mr. Blumenthal did not have, but it is important to note that none of those emails provide any new insights on the attack on our facilities in Benghazi.

Do you think a third party should have been allowed to review what was turned over to the State Department, as well as the remainder that was not?

The Federal Records Act puts the obligation on the government official, not the agency or a third party, to determine what is and is not a federal record. The State Department Foreign Affairs Manual outlines guidance "designed to help employees determine which of their e-mail messages must be preserved as federal records and which may be deleted without further authorization because they are not Federal record materials." [5 FAM 443.1(c)].

Clinton responded to the State Department's request by providing approximately 55,000 pages of her work and potentially work-related emails. She has also taken the unprecedented step of asking that those emails be made public. In doing so, she has sought to support the State Department's efforts, fulfill her responsibility of record-keeping, and provide the chance for the public to assess the work she and officials at the State Department did during her tenure.

After her work-related emails were identified and preserved, Clinton chose not to keep her private, personal emails that were not federal records, including emails about her daughter's wedding plans, her mother's funeral service, family vacations, etc.

Government officials are granted the privacy of their personal, non-work related emails, including personal emails on .gov accounts. Clinton exercised her privilege to ensure the continued privacy of her personal, non-work related emails.

Can't she release the emails she provided to the State Department herself?
Because the printed copies of work-related emails she provided to the State Department include federal records of the Department, the Department needs to review these emails before they can be made public. She called for them to be made available as soon as possible, and is glad to see the Department has begun releasing them.

_Some of the emails released show Clinton emailed aides at times on their personal, rather than .gov accounts. Was she trying to hide these communications?_

As Clinton has said before, it was her practice to email U.S. government officials on their .gov accounts if it was work-related. This is evidenced in the emails released so far. In reviewing her emails in 2014, there was a fraction of emails with work-related information sent to U.S. government officials’ personal accounts, and those were provided to the State Department. The overwhelming majority of her work-related emails were to .gov accounts.

**Where was the server for her email located?**

The server for her email was physically located on her property, which is protected by U.S. Secret Service.

**What level of encryption was employed? Who was the service provider?**

The security and integrity of her family's electronic communications was taken seriously from the onset when it was first set up for President Clinton's team. While the curiosity about the specifics of this set up is understandable, given what people with ill intentions can do with such information in this day and age, there are concerns about broadcasting specific technical details about past and current practices. Suffice it to say, robust protections were put in place and additional upgrades and techniques employed over time as they became available, including consulting and employing third party experts.

**Was the server ever hacked?**

No, there is no evidence there was ever a breach.

**Was there ever an unauthorized intrusion into her email or did anyone else have access to it?**

No.

**What was done after her email was exposed in February 2013 after the hacker known as "Guccifer" hacked Sid Blumenthal’s account?**

While this was not a breach of Clinton's account, because her email address was exposed, steps were taken at that time to ensure the security and integrity of her electronic communications, including changing her email address.

**Was the State Department able to respond to requests related to FOIA or Congressional requests before they received printed copies of her work-related emails?**

Yes. As the Select Committee has said, the State Department provided the Committee with relevant emails it already had on the state.gov system before the State Department requested any printed copies from former Secretaries, and four months before the State Department received the printed copies.

For example, in the well-publicized hack of Sid Blumenthal's email account, a note he sent Clinton on September 12, 2012, was posted online. At first blush, one might not think this exchange would be captured on the state.gov system. But in fact, Clinton forwarded the email, that very same day, onto the state.gov system.
And the email was produced by the State Department to the Select Committee, and acknowledged by the Select Committee, in August 2014.

This example illustrates: 1) when an email from a non-.gov sender had some connection to work or might add to the understanding of State Department officials, it was Clinton’s practice to forward it to officials at their "state.gov" address; and 2) the State Department was able to search and produce Clinton’s emails when needed long before, and unrelated to, receiving the printed copies as they were already captured on state.gov accounts.

TECH CYBER SECURITY

For 3 months Hillary Clinton’s email access was unencrypted, vulnerable to spies

by Robert Hackett @rhhackett
MARCH 11, 2015, 9:12 AM EDT
Security firm Venafi has found that Clinton’s email server may have been open to foreign intelligence snoops when traveling abroad.

On Tuesday, former United States Secretary of State Hillary Clinton made her first extensive comments addressing her use of a personal email address and private email server while in office, saying that she did not use them to communicate anything confidential but that she wishes she had used a government-issued email address instead. She also sought the “convenience” of a single device.

Venafi, a Salt Lake City computer security firm, has conducted an analysis of clintonemail.com and determined that “for the first three months of Secretary Clinton’s term, access to the server was not encrypted or authenticated with a digital certificate.” In other words: For three months, Clinton’s server lay vulnerable to snooping, hacking, and spoofing.

“Without a certificate you have no assurances that a website you’re attached to or an email server you go to is the one you’re actually going to,” said Kevin Bocek, vice president of security strategy and threat intelligence at Venafi. “There could easily be a ‘man in the middle’ who could easily intercept communications because they’re not being encrypted.”

Without a proper digital certificate to stop them, bad actors can easily wedge themselves between users and the machines they’re attempting to access on a network and, in so doing, collect private information, and possibly even steal credentials such as usernames and passwords. Digital certificates—known more technically as X.509 certificates—are the foundation upon which browsers and servers set up secure and private encrypted channels to communicate. From Jan. 13 to March 29, 2009, clintonemail.com lacked one, Venafi’s analysis reveals.

Clinton’s office did not respond to request for comment by press time.
“Longterm access is probably ultimately the worst consequence here,” Bocek said, raising the possibility that hackers could have obtained Clinton’s compromised credentials and used them to continue accessing her email archive even after a digital certificate was added in late March. The most likely threat though, Bocek added, is spying. “If the Department of State had been eavesdropped on while on diplomatic mission that could have jeopardized a whole variety of activities.”

In fact, during that three month window during which Clinton’s email server apparently lacked encryption, she had traveled abroad. According to a public log provided by the State Department’s office of the historian, Clinton had visited countries and places such as Japan, Indonesia, South Korea, China, Egypt, Israel, the Palestinian Authority, Belgium, Switzerland, Turkey and Mexico. “In locations where the countries are known to operate and monitor network communications, like China and other countries, that certainly would be a real threat,” Bocek said, mentioning that some parts of the world are “known to have active eavesdropping campaigns.”

“Given the intentions of some countries, there is a real risk of communications being eavesdropped on and credentials being compromised,” he said.

John Kindervag, an analyst at Forrester Research who saw preliminary results from Venafi’s analysis, told Fortune that he considered the lack of a certificate protecting clintonemail.com “a pretty significant gap where systems may have been used but been totally unprotected from a security perspective, and therefore that email could have easily been intercepted and read by even the most amateurish attackers.” “It’s highly unlikely that a person of that importance isn’t being targeted by people who want to gain access to the computational devices in her possession,” Kindervag said. “By the looks of things at first blush,” he added, “it looks like it was a significant disregard for basic security principles and hygiene.”
“You can see from this issue why it's important to have digital certificates in use,” said Jeff Hudson, CEO at Venafi. “Man in the middle attacks, spoofing, eavesdropping—it proves the point once again that these things are foundational and when not dealt with correctly all kinds of bad things can happen.”

To conduct the analysis, Venafi researchers used a tool they’re now launching called TrustNet, which scans the internet and historical sources for information about digital certificates and helps assess their risks and reputations. The company has been compiling its own data base for the past year. You can read more information about Venafi’s analysis on the company’s blog.

This mail regarding Jade Helm is serious.

Greetings from Holland!

Recently I came across something on Metabunk.org touching upon the subject of the Jade Helm operation recently/currently going in the US. After doing some research on this, this seems to be a test run of an artificial intelligence controlled military operation. Coincidingly, the friend/foe map for this mission seem to correlate to a Veterans densities map pulled from "Pete Thiel's Palantir, a spy machine that is used to predict outcomes based on variable input.". http://www.jerrywdavis.com/bilderberg-leader-p-thiel-and-the-cia-surround-veterans-using-jade-helm/ This site is what that comes from.

If altogether bits of this appears to be a tangible truth, dearest Jade is going to need input to make its decisions. What could contribute to that input? The former NSA's PRISM program and related monitoring? Or perhaps even more elaborate: Microsoft’s Windows 10 data mining client? There is more interesting stuff surrounding Windows 10:

http://www.overclock.net/t/1569318/ars-even-when-told-not-to-windows-10-just-can-t-stop-talking-to-microsoft And this is another interesting bit:

http://www.overclock.net/t/1569215/techworm-unhackable-version-of-windows-built-by-israeli-security-company One thing that could possibly be done is to throw sand in the eyes of Jade to disrupt it. But that's beyond my turf, no more than throwing around ideas. You seem to be handy in IT.
My response: YOU ARE RIGHT, MICROSOFT DID INDEED BUY OUT AN ISRAELI SECURITY FIRM THAT HAS BUILT AN "UNHACKABLE" VERSION OF WINDOWS!

Ha ha ha, Israeli security and "Unhackable" are bipolar statements, just ask Magna BSP. After this, Microsoft is a dead company, if anyone is foolish enough to allow an Israeli security firm do anything for them they deserve the doom that progresses in a perfectly sequential fashion afterwards.

Never let a Jew store your records. They will be copied and used to rape you. Never let a Jew provide "security". Never let a Jew destroy your documents either, they will go in a storage bin while fake sawdust is dropped past a window to "prove" they destroyed them, and NEVER EVER in a MILLION YEARS let a Jew claim they have made anything at all "unhackable" because all this means is that you yourself will never find their back door, that leads straight to a comfy pad that allows them to eat, poop and take a nap inside your CPU!

Yes, Windows 10 feeding a Jade Helm type system, PERFECT and obviously BANG ON. Trollage has ensued over my post about Hillary's E-mails below. This proves I hit a bullseye.

The trolling method? To say I am saying Hillary is a better hacker than Snowden. This trollage will bite the dust for anyone who reads more than the first few lines, Hillary hacked nothing, she and her organizations simply had disloyal people inside the NSA hand her everything on a silver platter, and you don't need to know how to hack to accomplish that, you just need a huge budget (which she had) and huge exposure (which she had) and a huge following, (which she has). How many Jews are in the NSA anyway? Every last one of them would have helped Hillary out because they have the same goal - to destroy America.

UPDATE: As I go through the messages, the trollage against me saying the explosion in China was to divert the news away from Hillary has such a shrill desperate tone that I am taking it as confirmation that I NAILED THIS, READ IT AND WEEP:

"Many people are going to make the mistake of thinking that Hillary simply got access to a "spy satellite" but this is not the case, the satellite in question does no spying, it is simply a top secret NSA data hub and what was sent through it straight to Hillary was far far worse than any "spy satellite" could accomplish."

Tianjin blast quickly expunged from news and most forums, AND I KNOW WHY:

**SATELLITE CONFIRMED "DEATH SENTENCE" REVELATION: NO WAREHOUSE AT EPICENTER OF EXPLOSION**

Official story a proven (call it "error" for now).
This ought to be clear enough for ANYONE: 1. Where the big blast happened. 2. Where the "burning" warehouse was. There is a major orientation problem with the official story.

This appears to me to be an obvious attack, and if it was, the inaccuracy (in this day and age) can only be explained by a targeting error with a kinetic weapon. I'd bet $5 that is what we are looking at here. The crater has the attributes of an impact crater, not a bomb blast or explosion.

Those attributes are: A raised center (which could be seen before it filled in with water) and annular cracks surrounding the crater (still visible in all photos.)

The explosion was actually closest to their security gate and whatever other shipping companies surrounded Ruihai. The explosion was so massive that many many buildings have completely vanished, including all warehouses and storage areas owned by Ruihai and surrounding shipping companies, with only a concrete office building remaining (1 of 2). All others are completely gone without a trace. Selective deletion of buildings (based on what they are made of) is a hallmark indicator of a nuclear weapons type blast, and if this was a kinetic weapon, results are similar. To say this is a 27 ton blast is laughable.
One thing is made obvious by the very up to date "before" image: there was nothing at the epicenter that could have exploded, something other than chemicals did this. And the scale of the devastation proves it was definitely a multiple kiloton range blast, achievable ONLY BY A SUPER POWER NATION.

Now the only thing up to speculation is exactly why a superpower attacked China. Was it the currency devaluation? Hillary's espionage story in need of burial? You guess, at this point it is irrelevant, an attack is proven.

August 15 2015

BLOCKBUSTER: LATEST IMAGES SHOW THE BLAST PRODUCED A THREE ACRE LAKE! The new lake in China proves a 5kiloton blast, possibly nuclear or possibly from a space based "rod from God" (pictured to the left) weapon DEPLOYED BY THE SPACE PLANE, DING DING DING DING DING!

At first I doubted the "rod from God" because I have no explanation for how one could drop out of orbit and actually fall, but evidently this system is real and they solved that problem. That would make the rod from God the prime candidate here, because the Chinese could easily trace down a nuclear blast.

UPDATE: ANOTHER BLOCKBUSTER: Blasts were NOT RELATED, blast 1, the small blast, happened on the West side of the container lot, and was the crater everyone first saw with containers laying in it, thinking that was from the big blast. It was not. Blast 2, the lake making nuke type blast, happened on the East (central) side of the container lot. The fire happened to the South East of both blasts, and was ONLY A FIRE, there is no conceivable way it could produce blasts on both sides of a container lot, separated by over 200 yards. The materials in question simply could not do it. The warehouse that was supposedly holding whatever exploded was erased by the large (rod from God or nuclear) blast, as was everything else around that blast.
The crater pictures people posted previously were from the small blast, not the big one, a new picture which clearly shows where the big blast went off just got released by China. After looking through the images of the soviet nuclear tests, the new lake in China appears to have been made by a slightly sub surface burst of at least a 5 kiloton nuclear bomb. There is no way the earthquake from this was in the 2's. Take a look at the pond made by a test of a small nuclear weapon ground burst in Russia and compare it to that new lake in China, which is many times as big as the pond made by a nuclear test in Russia!

Now we have limited options for this blast, since nothing stored there could have possibly done this.
This was NOT an accident and the fracture pattern around the crater proves a sub ground burst. If it was a sub ground burst, then a small nuclear weapon is a possibility because once a nuke has to push dirt, the blinding flash will not happen. A slightly subsurface detonation would explain why camera sensors did not get strange artifacts. And if it was not a nuke, it was something else incredibly huge, the fracture patterns around the crater (now a lake) also support a meteor type impact, (rod from God) but not a fuel air bomb because fuel air bombs will not leave craters.
A little bit more of a detailed explanation: If the blast happened at ground level, almost all of the energy would go upwards and the blast would not have made a large deep crater, especially one large enough and deep enough to make that lake. If you look to the right hand side of the lake, you can see fracture patterns in the earth, which were caused by the earth being compressed sideways and not downwards. This would only be done with a sub surface blast. After the blast, the earth bounced back towards the center of the lake, which opened up the cracks.

Look closely at the ground around the lake. Those who claimed it was not a nuke cited the fact that if it was, everything around the crater would be vaporized and wiped clean. Now that we have the real crater pic from the big blast, YEP, it matches that perfectly. Take a look at the containers laying in the lower left corner of this picture - they have no paint or color, which means they had the surfaces incinerated by intense heat only a nuke or other super weapon would reach. If this was a carbide blast, they would be black or have their original colors to some degree, complete color change to only gray proves this explosion was FREAKING HOT.

That type and size of blast crater will only happen if a massive bomb goes off a few feet underground, such as a tactical nuke in a drain pipe which leaves scant few alternative options (see Rod from God), No chemical blast did that, PERIOD. The building that is still standing in the upper right hand side of the frame is a typical example of what is left after a nuclear test, concrete buildings seldom get leveled, but they do get gutted by nuclear blasts. Just look through pictures of the soviet nuclear tests and you will see this. **Bottom line? The aftermath is completely consistent with a nuclear blast.**

I think a glue fire was started as an excuse for this huge blast, which came considerably later. And who knows what made the first big blast, or smaller blasts that led up to it, but I am confident it was a show and not an accident. They wanted this filmed from all angles and set up the show to make sure people would be recording when the big one went off. If there were lots of little blasts before that, why was there not a single small blast after the big one? That is when I would think the small blasts should have started if this entire scenario was not contrived from the start.
What would be the motive for this attack? I don't buy the currency devaluation, but something else very tasty was going on that a distraction was needed for, SUCH AS:

You cannot "professionally wipe" a server and then hand it to ANY American intelligence agency, Hillary is BUSTED.

The only way you can secure a hard drive that is actually in the hands of the NSA is to either incinerate it or shred it down to dust. It won't matter if you use Norton Clean Sweep or some other app to purge it, even if a full write was done to the entire drive several times, enough stray magnetic data remains from past writes for the NSA to do a deep analysis of and extract - with errors, but they will at least know what is there, and THIS IS WHY THEY KNOW:

Hillary: THE ISSUE IS NOT THE E-MAILS, THE ISSUE IS THE FACT SHE HAD COUNTLESS SPOOKS INSIDE THE NSA FEEDING DATA STRAIGHT TO THE ENEMY. The mail box is just a diversion from this core fact!

The tribe controlled MSM is trying to pawn off the worst proven case of espionage in America's history as a "mishandled mail box!" The fact the NSA never found that mail box before Hillary gutted the nation also proves that spooks inside that organization covered it all up!

http://82.221.129.208/ab9index.html

Before- Tianjin industrial area
AFTER - Damage from Tianjin explosion
Before-- Tianjin industrial area
AFTER -- Damage from Tianjin explosion
DEAD MEAT REVELATION- NO WAREHOUSE AT EPICENTER OF TIANJIAN, CHINA EXPLOSION

This ought to be clear enough for ANYONE: 1. Where the big blast happened. 2. Where the "burning" warehouse was. There is a major orientation problem with the official story.

This appears to me to be an obvious attack, and if it was, the inaccuracy (in this day and age) can only be explained by a targeting error with a kinetic weapon. I'd bet $5 that is what we are looking at here. The crater has the attributes of an impact crater, not a bomb blast or explosion.

Those attributes are: A raised center (which could be seen before it filled in with water) and annular cracks surrounding the crater (still visible in all photos.)
ROD OF GOD SPACE WEAPON
HITS HERE
RODS FROM GOD  SPACE-LAUNCHED DARTS  THAT STRIKE LIKE METEORS  By Eric Adams  Posted June 1, 2004
This technology is very far out—in miles and years. A pair of satellites orbiting several hundred miles above the Earth would serve as a weapons system. One functions as the targeting and communications platform while the other carries numerous tungsten rods—up to 20 feet in length and a foot in diameter—that it can drop on targets with less than
15 minutes' notice. When instructed from the ground, the targeting satellite commands its partner to drop one of its darts. The guided rods enter the atmosphere, protected by a thermal coating, traveling at 36,000 feet per second--comparable to the speed of a meteor. The result: complete devastation of the target, even if it's buried deep underground. (The two-platform configuration permits the weapon to be "reloaded" by just launching a new set of rods, rather than replacing the entire system.)

The concept of kinetic-energy weapons has been around ever since the RAND Corporation proposed placing rods on the tips of ICBMs in the 1950s; the satellite twist was popularized by sci-fi writer Jerry Pournelle. Though the Pentagon won't say how far along the research is, or even confirm that any efforts are underway, the concept persists. The "U.S. Air Force Transformation Flight Plan," published by the Air Force in November 2003, references "hypervelocity rod bundles" in its outline of future space-based weapons, and in 2002, another report from RAND, "Space Weapons, Earth Wars," dedicated entire sections to the technology's usefulness.

If so-called "Rods from God"--an informal nickname of untraceable origin--ever do materialize, it won't be for at least 15 years. Launching heavy tungsten rods into space will require substantially cheaper rocket technology than we have today. But there are numerous other obstacles to making such a system work. Pike, of GlobalSecurity.org, argues that the rods' speed would be so high that they would vaporize on impact, before the rods could penetrate the surface. Furthermore, the "absentee ratio"--the fact that orbiting satellites circle the Earth every 100 minutes and so at any given time might be far from the desired target--would be prohibitive. A better solution, Pike argues, is to pursue the original concept: Place the rods atop intercontinental ballistic missiles, which would slow down enough during the downward part of their trajectory to avoid vaporizing on impact. ICBMs would also be less expensive and, since they're stationed on Earth, would take less time to reach their targets. "The space-basing people seem to understand the downside of space weapons," Pike says--among them, high costs and the difficulty of maintaining weapon platforms in orbit. "But I'll still bet you there's a lot of classified work on this going on right now."

The Rods are just one of the world's spookiest weapons. Launch the entire gallery of terrifying weapons here.

Calmatives

Steve Evans

Just as "overactive bladder" replaced "incontinence" and "habit-forming" took the place of "addictive" in drug ads and pharmacies across the country, so too has the Pentagon obfuscated "chemical weapons" with the positively delightful-sounding moniker of "calmatives." Only these aren't anything you want to take into your bubble bath. The most recent developments in calmative weapons come from Fentanyl derivatives. They
are massively powerful opiates—Carfentanil is a commercially available analogue used to tranquilize elephants—which are also highly dangerous. It is widely believed to have been the variant used by the Russian police against the Chechen rebels who held 850 people hostage in a Moscow theatre in 2002. Over a hundred of the hostages died from respiratory depression as a result of the exposure. Although these weapons are classified as "non-lethal" by the American military, it is clear they can very easily have dire consequences.
The Atomic Bomb

The first weapon on the list is arguably both the spookiest and the most terrifying from beginning to end. Whether you side with those who say its use in WWII prevented an
invasion of Japan and casualties on a much larger scale, or those who denounce its use as a war crime, it is arguably the only weapon whose effects have so vividly solidified in the popular consciousness after such little use (twice). The bomb's devastating reach extended well beyond the immediate blast radii; nearly half of the total number who died in 1945 as a direct result of the bombings in Hiroshima and Nagasaki died from burns, radiation poisoning, and cancers.

1 of 20

Project X-Ray
iStockphoto
In the early years of American involvement in WWII, a plan was conceived by a Pennsylvanian dental surgeon to strap tiny incendiary devices to bats and drop them by the thousands over Japanese cities. The bats—able to carry nearly three times their own body weight—would fly under the cover of night and take roost in traditional, highly-flammable wood and paper Japanese houses. As dawn approached, timers on the devices would ignite the "bat bombs" and entire cities would burn to the ground without the loss of life accompanied by, say, an atomic attack. The project was slowed by many complications and was ultimately shut down in 1944 because the bats would not be ready for combat until 1945.

1 of 20
MK-ULTRA
William Rafti
Begun in the 1950s by the CIA as a response to Korean techniques used on American POWs during the Korean War, MK-ULTRA became the code name for an extensive and covert program investigating the possibilities of mind-control through psychotropic and other mood-altering drugs. It was most notorious for dosing unwitting subjects with LSD [left] and following their behavior while under its influence. Another experiment involved injecting barbiturates followed by amphetamines, causing the subject to doze off and then be shocked awake into a trance-like state during which questioning would result in animated responses. In 1973, Richard Helms, CIA Director at the time, ordered all MK-ULTRA files destroyed, which effectively curtailed any meaningful investigation the Congress attempted to pursue two years later, in 1975.

1 of 20

The Stargate Project
iStockphoto
We move from spooky to kooky with an operation begun under the Army's military intelligence in the 1970s called the Stargate Project. While its aims may have had a scientific underpinning—it was an attempt to bring quantifiable measurements to clairvoyance—it was largely a last ditch effort to generate intelligence about a situation when there was no other avenue to pursue. The project used a small group of "remote viewers" who were people claiming to possess a variety of extra sensory abilities, from reading tarot cards to predicting the future, to divining the nature of covered or hidden objects in aerial photographs. While the results of any given viewing were kept highly secret so as not to damage the confidence of the clairvoyants, we can likely conclude the outcomes were not terribly accurate, as in 1995 the project was transferred to and subsequently shut down by the CIA.

The CornerShot
CornerShot
William Prescott readied his men at the Battle of Bunker Hill with the now famous words, "do not fire until you see the whites of their eyes!" Fortunately, his men were fighting in the American Revolution and not on the modern battlefield against the CornerShot, a weapon designed specifically so that the enemy will never see your eyes. A miniature camera and LCD screen sub in for the gunner's "eyes" as the front half of the rifle bends around corners in order to shoot targets without the operator having to come into the open. It works by mounting a semi-automatic pistol to the hinged front half with remote linkage to the trigger at the rear and can swivel through a 120-degree range.

1 of 20
Cetacean Intelligence Mission
U.S. Navy/Brien Aho
The Navy has been training bottlenose dolphins since at least the late 1980s to patrol and protect warships, hunt for mines, and even to carry darts and target divers for attack. Once word of the program got out, animal rights activists raised public awareness causing the Navy to turn the details highly classified; today, little is known about the extent of the operations. We do know that the animals were fitted with electronic harnesses, which ostensibly relayed signal commands, and that they were trained to recognize divers in wetsuits like prowlers in the night. How the mechanism of firing the darts was accomplished is anyone's guess.

1 of 20

The Gay Bomb
sunshine-project.org
We return to the subject of spooky bombs with a device that never got any further than a three-page report [excerpt at left]. In the document, issued by a U.S. Air Force research laboratory in Ohio in 1994, the proposal was to develop a variety of bombs of uncommon ordinance (at a cost of $7.5 million), including: a flatulence bomb, which would stink so badly as to drive the enemy out of its hiding places; a bomb which would make the enemy sweat profusely; and a "halitosis bomb," which would plague soldiers with bad breath. But the coup de grâce was the bomb now colloquially referred to as the "gay bomb." Using a hypothetical aphrodisiac of remarkable potency, the bomb would spray the enemy with a substance that would quite literally turn them gay, causing the soldiers to become "irresistibly attracted to one another" and, we can only assume, forget that they were in the process of being bombed.

The Trophy Active Defense System
defense-update.com
Tanks are frightening machines on their own without any need for upping the scare ante. So what could make these already heavily armored vehicles any more unstoppable? An invisible force field. Fine, so the Trophy Active Defense System isn't literally a force field, but it's as close as any countermeasure has yet come. Using a highly sophisticated network of radar units placed around the tank, the ADS can detect rocket propelled grenades and other low-tech munitions in time to target them and return pinpointed fire, destroying the munitions in mid-air. The ADS is capable of tracking multiple targets in nearly any direction, rendering tanks with the equipment nearly bulletproof.

1 of 20

Metal Storm
Metal Storm
Metal Storm is an Australian-based company that has been developing a line of weapons which use stacked projectiles. Stacked projectile weapons are different from traditional guns in that they have no moving parts. Instead of loading a bullet into a chamber and having a mechanism such as a hammer initiate its firing, the Metal Storm weapons use electronics to manage the firing sequence. Bullets are tightly lined up within the gun and each is packed between an explosive propellant; the result of which is a weapon that can fire at a much higher rate than a traditional automatic. One bullet enters the barrel before the last has left, which creates a torrent of ammunition with firepower not unlike a high-powered, comic book-style laser.

Cyborg Moths
robot.watch.impress.co.jp
As if most people weren't already creeped out enough by insects, the Defense Advanced Research Projects Agency (Darpa) has been working to develop cyborg spy moths. Darpa, the research arm of the Department of Defense, has already successfully implanted chips in cockroaches and rats, allowing humans to "drive" the animals with joysticks. In the case of the moths, the chip will be implanted at the pupal stage so that the animal grows around it and develops a "reliable tissue-machine interface." The spy moth will then be released at the front lines and remotely piloted into enemy territory, potentially beaming back video and audio feeds along the way.

The Navy's Railgun
U.S. Navy
The Navy is exploring the possibilities of trading the explosive energy of conventional warheads for kinetic energy using simple projectiles. On its face, it sounds like a step backward. But when you see the prototype railgun in action, firing a seven pound shell at seven times the speed of sound, you start to understand the power generated by tremendous acceleration: That non-explosive hunk of metal carries as much destructive force as a Tomahawk missile. The railgun works by storing a massive amount of electricity—the Navy is aiming for a 64 megajoule model—that is then sent through parallel rails. The current generates a strong magnetic field which then accelerates the projectile to mind-bending speeds. With the finished product, a 5-meter target can be hit from 200 nautical miles away.

The Puke Flashlight
Dept. of Homeland Security
No, it's not a rave toy gone horribly wrong, it's another spooky tool making its way into the hands of law enforcement and the military. Designed as one of a growing body of non-lethal incapacitating devices, the flashlight uses ultra bright, rapidly pulsating LEDs.
to first temporarily blind and then induce nausea and sometimes vomiting. The pulses quickly change color and duration, which can cause psychophysical effects in many people (although to what extent varies significantly). The same effect is sometimes inadvertently seen by helicopter pilots when sunlight rapidly flashes through their rotors, disorienting them in mid-flight. The flashlight has obvious downsides—the victim must be in front of the light and must not think quickly enough to look away—but is a promising tool for non-violent enforcement.

Mobility Denial System

We now move from the spooky into the somewhat goofy with the Marine's Mobility Denial System; a fancy name for what is essentially cartoon slime. It's actually less Inspector Gadget and more a potentially effective and valuable idea. It works like this: two polymers are mixed together—a liquid and a powder—to make a slurry, which is then pumped into a nozzle where it meets a stream of water. On contact with the water, the slurry turns into a viscous, sticky, and slippery gel, which can be sprayed on nearly any surface. It remains gooey for many hours, and when it dries can be swept away or reactivated with more water. It's target uses are in crowd control and protecting building entrances or checkpoints. The only real danger comes from slips and falls; people reportedly have less control on the slime than they do on ice.

A Military-Grade Stink Bomb

The Air Force lab responsible for the gay bomb and the fart bomb have nothing on what the DOD has in the works today. Researchers at the Monell Chemical Senses Center in Philadelphia are working with the Department of Defense to develop the baddest smell you ever smelled. We're talking a mixture of vomit, excrement, B.O., burnt hair, and rotting flesh and garbage. Just thinking about it is making me queasy. The important thing to note is the need for a combination of many sources of stench—just vomit or just burnt hair won't do it because our brains can too readily adjust to accommodating one stink. But throw a half dozen at us and we're at the mercy of our gag reflex. Ultimately, the potent cocktail could be used in a "bomb" of sorts for crowd dispersal. It's also being considered for helping soldiers become accustomed to unpleasant environments.

The Scream

The Israeli Army has developed a device they're calling "The Scream," which issues short bursts of highly tuned sound designed to get in someone's head and stay there
most uncomfortably until they leave the device's range. The noise isn't particularly loud and the effect is nothing like standing too close to the speakers at a rock show. Instead, it's tuned to a specific frequency that targets the inner ear and disrupts a person's equilibrium. The result is nausea and dizziness even after the sound is no longer broadcast. It is an unbearable sensation, and covering your ears is no defense.

1 of 20

Active Denial System

DoD

The U.S. Air Force has borrowed a page out of the Marine's naming conventions book (see: Mobility Denial System) with a device more commonly known as the "heat ray." The heat ray looks like a nondescript satellite dish, mounted on the back of a military-grade news truck. But instead of gathering and focusing radio waves coming in, the weapon focuses millimeter waves (similar to microwaves, but shorter) and sends them out. The effect of those waves against human skin produces a sensation of intense burning which people are reportedly only able to stand for a few seconds. The military claims the waves penetrate the skin by only one sixty-fourth of an inch and cause no lasting damage, but the system is still in the early stages and is as yet unproven in the field.

The Rods from God

John Macneill

This one would be the hands down winner for spookiest name if the award weren't just a consolation prize—the Rods from God will do just fine competing for the spookiest weapon, regardless of name, thank you very much. They are a kinetic energy device like the railgun, but instead of using electricity to achieve destructive velocities, they use gravity. The still-hypothetical system would be comprised of two satellites in orbit around the Earth. One would house the communications and targeting hardware, while the other would house the rods themselves, each up to a foot in diameter and twenty feet long. To fire, they would simply be released and allowed to fall back to Earth (with a bit of remote guidance). By the time they reached the surface, they'd be traveling at a speed of 36,000 feet per second and carry the destructive force of a nuclear warhead, only with none of the radioactive fallout.

1 of 20

Modular Disc-Wing Urban Cruise Munition

iStockphoto

Again, we're fans of the colloquial name: robotic frisbees of death. Currently in development under the auspices of the Air Force, the frisbees of death are robotic drones in the shape of flying discs and are designed for short flights into difficult to reach areas, like the upper stories of tall buildings or behind unnavigable obstacles.
Sent airborne from a modified skeet launcher, the drones can either fly automatically or be piloted remotely from the ground. They'll be packed with armor-piercing explosives and can be set to detonate all at once or to disperse their payload over a range.

Airborne Laser
U.S. Air Force
While the Pentagon continues to fund a woefully unsuccessful Star Wars project dedicated to shooting down missiles from space, the Air Force is on its way to having a modified 747 ready as early as 2009 to shoot down missiles from the sky with—you guessed it—a massive laser. Known as the Airborne Laser, the craft will house a multi-megawatt chemical oxygen iodine laser capable of hitting a target many hundreds of miles away. At its core, it's the same basic technology as found in a drugstore laser pointer, only a billion times more powerful. While the craft is scheduled for its first live target test in 2009, the laser and the airplane have yet to be tested together.

Calmatives
Steve Evans
Just as "overactive bladder" replaced "incontinence" and "habit-forming" took the place of "addictive" in drug ads and pharmacies across the country, so too has the Pentagon obfuscated "chemical weapons" with the positively delightful-sounding moniker of "calmatives." Only these aren't anything you want to take into your bubble bath. The most recent developments in calmative weapons come from Fentanyl derivatives. They are massively powerful opiates—Carfentanil is a commercially available analogue used to tranquilize elephants—which are also highly dangerous. It is widely believed to have been the variant used by the Russian police against the Chechen rebels who held 850 people hostage in a Moscow theatre in 2002. Over a hundred of the hostages died from respiratory depression as a result of the exposure. Although these weapons are classified as "non-lethal" by the American military, it is clear they can very easily have dire consequences.
The Atomic Bomb

DoD

The first weapon on the list is arguably both the spookiest and the most terrifying from beginning to end. Whether you side with those who say its use in WWII prevented an
invasion of Japan and casualties on a much larger scale, or those who denounce its use as a war crime, it is arguably the only weapon whose effects have so vividly solidified in the popular consciousness after such little use (twice). The bomb's devastating reach extended well beyond the immediate blast radii; nearly half of the total number who died in 1945 as a direct resulting of the bombings in Hiroshima and Nagaski died from burns, radiation poisoning, and cancers.

**Bilderberg Leader P. Thiel and The CIA Surround Veterans Using Jade Helm**

Posted by: Jerry

I listened to a very interesting radio show last night called The Pete Santilli Show. Mr. Santilli was discussing a Bilderberger named Pete Thiel and Mr. Thiel's artificial intelligence software called “Palantir”, which is software that uses natural search language to identify potential criminal activity. It does other things too, but our conversation is focused on the “predicting criminal activity” part, and the relationship Pete Thiel has with Washington, D.C., the Bilderbergers and Jade Helm.

To save some time, “JADE” is a software application the military is now using that allocates manpower and equipment on-the-fly based on prior experience and events. It is an artificial intelligence application that learns which tactics and personnel were most successful in different scenarios. That is the “JADE” part of Jade Helm. JADE is taking the helm (lead) in this exercise, and the plan is to encompass the most dense pockets of veterans. It is either a practice run at fighting a civil war against constitutionalists, or it is indeed a civil war. The target: Dense populations of veterans giving the most bang-for-the-buck to the globalists.

First, a short wiki link to Mr. Thiel’s wiki page: [the link to the entire page](https://en.wikipedia.org/wiki/Peter_Thiel)

**Bilderberg Group**

Thiel is listed as a member of the Steering Committee of the Bilderberg Group, a private, annual gathering of intellectual figures, political leaders and business executives.[62]

Support for political activism

Thiel is a self-described conservative libertarian.[63]

Thiel has supported gay-rights causes such as the American Foundation for Equal Rights and GOProud.[64] In 2010, Thiel held Homocon 2010 for GOProud, an LGBT conservative/libertarian organization, in his New York City apartment. Thiel himself is gay.[65][66][67]
The reason I note his homosexualism is because no follower of Jesus Christ can also be a homosexual and promote homosexualism. Its important because if one does not follow The Lord, one does in fact belong to Satan. When one belongs to Satan, bad outcomes are easy.

Bilderbergers Steering Committee

Let's note that Thiel is on the Steering Committee of the Bilderbergers, and that he is a homosexual. Assuming you already know that the Bilderbergers want to depopulate the earth, which includes your own death, do you think that the homosexual Thiel considers Gods command that we are our brothers keeper as important? To be homosexual is to establish enmity toward God. God destroyed Sodom and Gomorrah due to homosexual sin, and tells us that homosexualism is an abomination to Him. So no one who practices homosexualism is a child of the Most High. If one is not a child of The Lord, then one is by default the child of Satan. There is no “middle zone” for the undecided. We have the child of Satan Peter Thiel steering the direction of the most powerful group of other children of Satan, the Bilderbergers. He leads them, guides the conversations and sets the agendas. Don’t you think it is reasonable to believe the Bilderbergers are neck deep in Jade Helm?

The Bilderbergers are well known to many, and any Startpage.com search (a private, secure search engine that uses anonymous google search results for you) for them will get you a ton of great information. The short story is this: Bilderbergers want to decrease the human population of the earthly by several billion. Yeah, that’s you and me and all our friends – dead.

Its all about world government, hidden behind the word “globalization”. Whenever you hear that word, know this: It is about world government where one despotic devil rules over a handful of other despotic devils, who own and operate major corporations, sit on the boards of others, “govern” nations, and all steal from each other while you and I starve to death or are executed because we are Christians and refuse the Mark of the Beast. Government becomes a mere tool to use military force to enslave populations of entire nations.

Jade Helm 15

Billionaire Pete Thiel the homosexual Bilderberger Steering Committee member is using his frighteningly powerful Palantir software to identify the areas where the most US military veterans are concentrated. According to his own wiki, he does business with multiple Federal agencies, including the NSA and CIA.

The CIA Funded Palantir

From Thiel’s own wiki page, an image I took as proof that at least today, the information was published. Click the image to get a bigger look at it. The sentence in the center is all you need to read.

So, either the CIA asked Thiel to run Palantir, or Thiel asked the CIA to fund it. Either way, Palantir is a spy machine that is used to predict outcomes based on variable input.

Note that Palantir is used “to predict outcomes”. It is named after the Hobbits Palantir stones, also used by Sauron in the Lord of the Rings to see into the “secret places”.

Therefore the CIA’s Palantir software is considered by the CIA to be the “Eye of Sauron” to be used against American civilians in the Bilderberg population reduction movement.
Remember the scripture from the Holy Bible that says “From the fullness of the heart, the mouth speaks.”? When the CIA calls their most advanced profiling software “the eye of Sauron”, its more proof that they are Satanic, they consider themselves to be, in fact, Sauron, the dark lord of Mordor. Remember Sauron’s plan? Do you remember what Saurons’ goal, his mission was?

Important! The CIA obviously believes JADE HELM has the **DESIZED OUTCOME** based on estimations by their Palantir technology.

The CIA wants to know where the most resistance to a world government ruling over the United States will come from and the answer, per Janet Napolitano, former director of the DHS, is **“war veterans”**.

[Download the unclassified DHS report here.](#)
Watch the news videos below.

Palantir Map Of The Terrorist Veterans

The CIA subsequently wanted a map of the places where the population density of US war veterans is highest, and went to Pete Thiel, the Bilderberger and Director of Palantir to get the information.

Mr. Thiel produced the following map for the CIA. This map indicates where the CIA will find the most concentrated areas of military veterans, or as the DHS classifies them: **TERRORISTS.**
The map above is unremarkable in and of itself. Lots of good fighters come from the Southwestern part of the United States. There are a lot of retired officers concentrated in Arizona, Texas and California.

But the one striking facet of the CIA/Palantir “veteran density” map is that it looks EXACTLY LIKE the JADE Helm 15 Hostile Territory map.
In Colorado, the military dropped Jade Helm and replaced it with the same thing under a different name, Raider Focus. The dark blue area in the Colorado map is the **Colorado Springs area**. It is loaded up with US military veterans and I have seen the recent images of truck loads of razor wire being taken to somewhere in that area for the Raider Focus military operation.

**Knowing the following:**

- The CIA is the financial sponsor of the Palantir software
- The man who runs that Palantir operation is a homosexual Bilderberger leader
- The Jade Helm/Raider Focus maps of operations surround the most dense populations of US military veterans
- The DHS (another customer of Palantir) considers veterans terrorists

**what do YOU think the true purpose of Jade Helm/Raider Focus is?**

The Government Wants You DEAD!

They are making their list and they’re checking it twice, to make sure you are put on the RED LIST for FEMA Camp incarceration and execution, ESPECIALLY if you are a Christian, are Jewish, love America and the Constitution and freedom and hate the upcoming Satanic worldwide New World Order enslavement Antichrist scheme these evil Satanists and others are feverishly planning to impose upon the world once America collapses. Then they will steamroller the world with the NWO agenda with little resistance. You have been warned.

PRAY VERY HARD!!!

“Terrorists Will Nuke New York City!”
Says The Lord God Almighty - Collected Intelligence and Serious Prophetic Warnings

Terrified at her torment, they will stand far off and cry: “‘Woe! Woe to you, great city, you mighty city of Babylon! In one hour your doom has come!’” Then a mighty angel picked up a boulder the size of a large millstone and threw it into the sea, and said: “With such violence the great city of Babylon will be thrown down, never to be found again.” Holy Bible, Revelation 18:10, 21

PROPHECY- God’s Wrath and Judgment Against The U.S. Intelligence Agencies
given through Brian Charles

“I’M gonna destroy it.” --the CIA
“…and the NSA too.”
“I know EVERY secret thing that is going on!”
“All the intelligence agencies will be gone by My hand, you can count on it!” “They have disobeyed Me long enough!”
“All intelligence agencies will be destroyed by My hand. You can count on it! They have disobeyed Me long enough! They have destroyed long enough. They must be punished. Thus says the Lord of hosts. Amen”
“I'll destroy the CIA.” “...and the NSA too.”
“I AM going to destroy this country mightily!”
“I AM the limitless God!”
“Laugh at the occultists!”
“I'll destroy your empire.”
“I shall judge for that!” --for sinners living their lives like God doesn't exist

“So do not be afraid of them, for there is nothing concealed that will not be disclosed, or hidden that will not be made known. What I tell you in the dark, speak in the daylight; what is whispered in your ear, proclaim from the roofs.” Holy Bible, Matthew 10:26-27
“He thwarts the plans of the crafty, so that their hands achieve no success.” Job 5:12
For it is written: “I will destroy the wisdom of the wise; the intelligence of the intelligent I will frustrate.” 1 Corinthians 1:19
“Therefore once more I will astound these people with wonder upon wonder; the wisdom of the wise will perish, the intelligence of the intelligent will vanish.” Isaiah 29:14
“To the faithful you show yourself faithful, to the blameless you show yourself blameless, to the pure you show yourself pure, but to the devious you show yourself shrewd. You save the humble, but your eyes are on the haughty to bring them low.” 2 Samuel 22:26-28

PROPHETIC JUDGMENT OF THE ILLUMINATI-MASONs AND BABYLON

A Hidden Agenda: “Babylon, at its inception, had as its goal, to rule in both earth and heaven. Now that it has grown to its fullness, we see that evil men behind the ruling powers of the earth are working feverishly to make a complete take-over of the earth in the form of a “one-world government.’ That is their agenda.

“These have not reckoned on a Living God who controls all the earth and all that is in it. I also have an agenda which I declared from the creation of mankind. Is it not that I have created man for My glory and My purpose is to make him like Myself! No man can cancel out or put aside My agenda, for it alone shall stand in this day. I shall break in pieces the plans of men and their counsel shall not stand! I am the Lord and My purposes shall stand. My Word can never return unto Me void.

“The days of awe have come when I shall intervene in the hidden agendas of evil men and show forth their smallness and their weakness before Me. It is the time for Babylon to
fall and great shall be the fall thereof. Mourn not for her but rejoice that My plan is now coming forth and man’s plan is finished and has come to naught.

“Rejoice in this: that I am the Lord and there is no god beside Me. I speak and it is done. All men shall fear Me, for I am their Creator and My Word is established in the heavens and it shall be done in all the earth.”

Psalm 33:8, “Let all the earth fear the Lord: let all the inhabitants of the world stand in awe of Him.”

Babylon is Judged: “I am preparing the answer to the problem before the problem appears in all its fullness. That little stone cut out of the mountain is the cause of Babylon’s fall. It is not a people prepared because of her fall, but it is because of their preparation that Babylon can no longer stand! (Daniel 2:44-45).

“Because My sons stand in My righteousness in the earth, bearing My word and My righteous judgments in their mouths, Babylon’s time has come and the judgment of the great whore has come—she who captivated the whole world through her sorceries shall fall and not rise again and great shall be the fall thereof.

“All mighty works done in the earth originate in the heavens, and mighty edicts and proclamations are being made in the heavenly realm in this day, for it is the Day of the Lord when Babylon’s judgment is upon her.

“The people are being lulled into believing in a “recovery” from her illness, but there shall be a death, not a recovery! Babylon shall fall and not rise again and great shall be the fall thereof. My kingdom, which has been hidden, shall suddenly appear and shall be greeted with both joy and fear—joy to the simple who look for a better way, and fear to those who will lose their own wicked way. Your eyes shall see it and rejoice and I will be magnified in your eyes and My awe shall be upon all My people who understand what I am doing in this Day.

“Walk closely to Me. Fear not, but magnify Me in the fires!”

His Finest Hour: “Men will say of one who has wrought a mighty work in the earth: ‘This was his finest hour.’

“I want you to know that My ‘finest hour’ lies shortly upon you—even when I shall display to the God-despising, My handiwork in the earth.

“Man takes great pride in his exploits of science and space-conquering prowess, but these things are as a child’s toy in comparison to what I have made: even a man, a many-membered man in My image and likeness! There is nothing that man can do in his own power to compare with the work of My Hands in preparing a people in whom the Spirit of the Lord will be pleased to dwell in fullness! Within them are all the answers that mankind has need of, and all the power to bring forth those answers! In these, I shall be greatly glorified and man’s works shall seem as child’s play when men see what I have wrought in earthen vessels who have been obedient unto My Word.”

“Looking unto Jesus the author and finisher of our faith; who for the joy that was set before Him endured the cross, despising the shame, and is set down at the right hand of the throne of God.” (Hebrews 12:2).
"Seek Me with weeping, fasting and a contrite heart. I will save individuals and you shall shine like the stars forever. Repent, oh nations!"

PROPHECY  My Full Judgment
Word of the Lord through Susan Perkins McNally September 7. 1994

My beloved and peculiar treasure, yea, those whom I have redeemed. Hear the words of My mouth. That which is happening in the United States will astonish the whole world as My full judgment comes upon your land. The erratic weather will be specific judgment on specific areas as to their individual transgressions against Me.

The East coast will experience the cold breath of my wind. Just as they are cold and indifferent to My Spirit, so shall they be given to drink at My hand this cup of cold fury. As the inhabitants shake their heads in astonishment, this blast of My wind will bring them to their appointed time of reckoning as I force them to consider their ways as their lives come to a standstill.

The West coast which burns in its lust with their insatiable desires and perversions will experience great fires and drought. Their cities will go up in flames and their infrastructures collapse. Yes, the great quakes are coming as the earth shudders at their wickedness. The resultant fear and panic will cause great loss of lives!

Those areas that call upon Me in repentance can be spared certain aspects of My judgment, but the whole land will mourn. Yea, it is not just America that will be judged but the whole earth shall know that I the Lord God have done these marvels. All over the earth fighting and wars that were thought to be little skirmishes will turn into bloody battles and explosive wars. The cry of peace, peace will be a hollow echo in the face of great upheavals.

Since the world governments and financial systems have worshipped the demon of greed so shall their idols be toppled and their systems be brought down! Entire countries will go bankrupt overnight and default on their loans and obligations. The entire international banking system that has been built on greed, fraud, deceit and murder will crash. The dust of their defeat already hangs suspended in the air like a choking mist.

Your political structures in the United States will crumble as I reveal the sins and the nakedness of your elected officials. I will judge your leaders who have shaken their fists at Heaven and profaned My Name and mocked the Son of My Love, Jesus. The White House will become a deserted mausoleum as in an abandoned cemetery, as My judgment comes upon this house of "blood and perversion." For truly I will recall the great evil that has been spoken against Me and My children and all the evil schemes and devices that your leaders have thrust out against My people, the Body of Christ. They will bring a swift rebuke against your leaders and they shall tremble in great fear as My fury passes by them. If their hearts are pure they will not be touched. If their thoughts and deeds are wicked they shall be consumed.
Like vomit, the land will heave out this great evil and the floods of my displeasure will wash the filth and defilement out of the way. Be certain that life as you have known it and as it has been in the past when this nation walked in My judgments, putting Me first, cannot be regained until all the evil roots and fruits have been laid waste.

Fear not, My Beloved, and be not dismayed; for that which I do always results in redemption. Only the power of My Spirit and My Great Name can deliver you and your nation. Draw close to Me. Intercede for your brethren. Let your eyes be filled with tears and your heart with intercession. Stand in the power of My might, in the Name of Jesus, and don't be intimidated by the threats and schemes of dying men.

Yes, the time is short, and you shall truly see the sustaining power of My majesty as you abide in Me. I will not leave you or forsake you. Be bold and of good courage, for it is I the Lord that goes before you!

The Prophetic Judgment of Those In Secret Societies
Scott Hofstee
September 3, 2001

To all of you who dwell in the secret institutions of the earth, your punishment will be the greater. You have brought about death and destruction every place you have gone. You have judged with a sour stomach. Your bitterness has known no shame. You have poured scorn from a bitter cup and shown no mercy, so no mercy will be shown to you. You have sown seeds of darnel and that shall be you harvest, but there are many among you who know Me because you have judged all your life, but your judgments were not from Me. You judged to save Babylon. You have tried to make your world a better place and forgot I created this world. You have tried to save the world and your own world for the sake of vanity. You have no power to save nor to judge. Who shall save you? Certainly not this world. Only I your God can save you. Tell the fathers of your institutions that you are leaving this world. Separate yourselves from this corruption and you shall be saved. I see My light in you, so separate yourself from your worldly institutions and come back to the land of your Father. Come dwell in My Spirit that I may love you and bring you home to Me. To you who have clothed themselves in uniform, you are an army of Judas. Woe to you sons of perdition. When did you see Me, your Lord, send guns and swords from the sky. You think yourselves lords of the earth and that is all you are, you are protectors of soil and weeds. You know nothing of My kingdom. Do you not know it was I who created the earth, that you now think you own? I AM the author of life not you. Woe to you who give orders to the armies of the world, I will scorch the land you so long to own. I AM God alone and who shall dare to stand against My angelic army. I AM about to bring heaven down to you because it is My love. It is My plan and it is My will. Woe to you soldiers of Judas. Why do you say thy will be done on earth as it is in heaven and then do the will of the great serpent? Can you not see in My language that it is I your God that speaks? Listen, I say to you, open your ears, I no longer plead or warn you, I command you to listen. Separate yourselves from your serpent, Satan and return to Me. Only I your God can give you life. Do not deceive yourselves or be deceived, you are in the army of the lost. I hear you say, but they shall kill me? So where is your courage now? If you die,
remember you die for Me, no greater love has any man that he lays down his love for his friend. I AM your friend and I AM your God.

PROPHECY TO THE PENTAGON
I am against your plans to make war against My people and My land. Is it a small thing in your eyes for you to make war against Me? saith the Lord. You trust in the technology of the “Fallen Ones” and the hidden and secret weapons that you believe will keep you safe. Has it not dawned on you that, as you study in your war colleges, that betrayal and destruction have come from traitors within and armies without?
The son of perdition has been a liar since the beginning of time and, as all empires before you have fallen, littering in the pages of history, so will yours. Your lives in an instant will flash before you. Repent and turn away from your evil schemes. Just as Judas sold My Son Jesus out for thirty pieces of silver, so have you sold Me out! For it is I, the Living God, Who gave you the victories over your foreign enemies when you sought to preserve that which was just. Are you so deceived and seduced that you cannot see the illuminated ones will turn on you and utterly consume you, and their promises will fail to give you your expected outcome?

PROPHECY TO THE GATE OPENERS
I ask you a simple question. Who do you think bound the demons and the fallen angels that you seek so feverishly to loose in the first place? For it was I, the Living God, out of the love for My creation (mankind) that bound them at the first time and will seal them in eternal chains the final time.
The promise of eternal life apart from Me will not deliver you from My wrath and My judgments. And now I say to My Generals, Colonels, Majors and Captains, and all of those who still call themselves by My name to the fighting men and women - let not your heart’s be troubled. For I will strip the veneer off those who feign to serve Me so you can see the evil one’s plans behind those who send you to your death.
The time is at hand that you will have to do what I have put in your heart to do. You will have to resist the orders that have been given to you to destroy your brethren, in your own country, with all that is within your reach. I will lay out My plans clearly before you in dreams and visions and Holy Angelic encounters. For I, the Lord, will protect and provide for your families as you seek Me in prayer and fasting, and seek Me with all your hearts.

Jesus Says, "Make My Day, Illuminati!"
Garrett Crawford - 3/12/07
I was in this huge, secret underground bunker deep in the Earth. It was a place of good, not evil. All the inhabitants/scientists who worked there were in white lab coats. They were trying to keep this place a secret from evil men, the Illuminati. This was the place where Jesus Christ dwelled, it was his home. (The Illuminati thought that if they could take over this underground control center they would have control of what lived there as well, which was Jesus Christ.) The Illuminati had somehow found out where this place was and sent its minions there. They quickly took control of this huge bunker; they had machine guns and wore black military uniforms. The good scientists that worked there told me this
bunker had to be destroyed now because the CFR and another group (which I can't recall) found it and it was no longer secret. I was a little shocked because this place was so big, modern and full of hi-tech equipment, but I guess it was the best thing to do considering the circumstances. After the military men took total control of this compound and took all the scientists prisoner, they were pretty full of themselves. They thought that they had basically won, but they still had one more thing to do, and that was to wait for Jesus to come back (this was his dwelling place) so they could trap him. After a while of standing around with the men in the main area (which was huge, both in length and height) all the sirens started going off and red warning lights started to flash. All the men became struck with fear. I heard one of the men say, "It's Jesus! He's coming! Hide!" At that moment, the commander told all the men to fall back and hide in the rooms that were off to the side. Everyone ran to the doors and closed the blast doors. So there I was, standing all alone in this huge place, all alone with sirens and lights going off. I knew something big was about to happen. I looked down this huge tunnel and saw something coming. The cameras in the tunnel quickly turned all at once to the direction where this thing was coming from -- the anticipation was incredible. All of a sudden I saw a huge, powerful being come through the tunnel and enter into the bay area where I was standing. It was above me and I was in awe as I stared at it. It was Jesus Christ, but it was not in the form of a man. It was in the form of an invincible metallic cloud that looked like liquid mercury. It was just floating in the air near the top of the ceiling which was like 250 feet high. I was overwhelmed by the site of this; its power and strength were incredible. It was like the ultimate war machine but it was also very peaceful and calm. As I was looking at this I was like, 'There is no way those Illuminati military men could stand a chance against this thing, what were they thinking?!' I understood that this being could not be trapped or taken prisoner like those military men had thought; it was just too powerful and invincible. I continued to stare at it and then I woke up.

Note from David: The underground bunker is in the hearts of the elect. The Illuminati will find this hideout but they can't do anything about. He is too big and elusive. :o) All you who are studying the Illuminati better study Jesus; to be found in Him.

Update from Garrett the next day: That dream makes me think about in Revelation when the men of the world gather to fight against the lamb, but when he comes they run in fear and hide, calling for the rocks to fall on them. (The soldiers in the dream were ready to fight and trap Christ if possible, but once they heard Christ coming they ran and hid themselves! lol) The sirens that went off that told the men that Christ is coming made me think of the trumpet or the loud shout that comes before Christ comes back. The way Christ was portrayed to me was totally spiritual and symbolic, it was like an invincible metallic cloud of pure power in which nothing could defeat. It was like an unleashed attack dog ready for war, all the while looking so calm and gentle, it was amazing to behold.

What Is Man That Thou Art Mindful of Him?
Antares is the 15th brightest star in the sky. It is more than 1000 light years away. The universe is so vast it is not comprehensible by the human mind. It would be like an ant trying to understand the wonder of the Internet. It can't be done. The universe humbles us as it should.  http://www.ubm1.org/?page=jesussays
